HOW RISKY IS IT?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

AGF Investments Inc. has rated the volatility of this fund as **medium**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see "What are the risks of investing in the Fund?" and "Specific risks of the Funds" sections of the fund's simplified prospectus.

No guarantees

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.

HOW HAS THE FUND PERFORMED?

This section tells you how Series W units of the fund have performed over the past 4 years. Returns are after expenses have been deducted. These expenses reduce the fund's returns.

Year-by-year returns

This chart would generally show how Series W units of the fund performed in each of the past 4 calendar years. However, year-by-year returns for Series W units of the fund have not been presented for year 2020, because Series W units were not outstanding for a full calendar year. Series W units dropped in value in 2 of the last 4 years. The range of returns and change from year to year can help you assess how risky the fund has been in the past. It does not tell you how the fund will perform in the future.

Best and worst 3-month returns

This table would generally show the best and worst returns for Series W units of the fund in a 3-month period over the past 4 calendar years. However, the best and worst 3-month returns are only being presented for years 2017-2019, since Series W units were not outstanding for a full calendar year for year 2020.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	19.4%	February 28, 2019	Your investment would rise to \$1,194
Worst return	-14.3%	September 30, 2018	Your investment would drop to \$857

Average Return

The annual compound return of Series W units of the fund has not been presented, because Series W units have not been outstanding since inception.

Effective April 18, 2019, the fund's investment objective was changed to offer increased flexibility to allocate the fund's capital to real assets beyond those companies operating in the precious metals and natural resources sectors. Performance prior to this date would have been different had the current objective been in effect.

A WORD ABOUT TAX

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, generally, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.
