Management's Responsibility for Financial Reporting

November 24, 2021

The accompanying financial statements of the Funds (as defined in Note 1(a) and (b)) have been prepared by AGF Investments Inc. (the "Manager"). The Manager of the Funds is responsible for the information and representations contained in these financial statements.

The Manager maintains appropriate processes so that relevant and reliable financial information is produced. These financial statements have been prepared in accordance with International Financial Reporting Standards and include certain amounts that are based on estimates and judgments. The significant accounting policies which management believes are appropriate for the Funds are described in Note 2 to the financial statements.

The Board of Directors of the Classes (as defined in Note 1(a)), through oversight, is responsible for reviewing and approving the financial statements after reviewing management's report of its financial reporting responsibilities.

The Board of Directors of AGF Investments Inc., through oversight, is responsible for reviewing and approving the financial statements of the Trust Funds (as defined in Note 1(b)) after reviewing management's report of its financial reporting responsibilities.

Our opinion

In our opinion, the accompanying September 30, 2021 financial statements of each Fund present fairly, in all material respects, the financial position of each Fund, its financial performance and its cash flows as at and for the periods indicated in note 1 in accordance with International Financial Reporting Standards (IFRS).

What we have audited

The financial statements of each Fund comprise:

- the statements of financial position as at the period-end dates indicated in note 1;
- the statements of comprehensive income for the periods indicated in note 1;
- the statements of cash flows for the periods indicated in note 1;
- the statements of changes in net assets attributable to holders of redeemable shares or units, as applicable, for the periods indicated in note 1; and
- the notes to the financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of each Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Other information

Management is responsible for the other information of each Fund. The other information comprises the Annual Management Report of Fund Performance of each Fund.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of each Fund, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements of each Fund or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Independent Auditor's Report

CONTINUED

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements of each Fund in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the ability of each Fund to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate any Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the financial reporting process of each Fund.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole for each Fund are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements of each Fund.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements of each Fund, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of each Fund.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of each Fund to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements of each Fund or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause any Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements of each Fund, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk. As at September 30, 2020, the Fund held cash and cash equivalents of approximately 10.3% of Net Assets, which were deposited with an A-rated financial institution.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

As at September 30, 2021, the Fund did not hold any significant cash and cash equivalents. As at September 30, 2020, the Fund held cash and cash equivalents which were subject to fluctuations in the prevailing levels of market interest rates. If market interest rates had changed by 25 basis points, with all other variables held constant, interest income would have changed by approximately \$352,000.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 5% change in benchmark (September 30, 2020 – 50 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Impact on Net Assets (\$'000)

Benchmark	September 30, 2021	September 30, 2020
-----------	--------------------	--------------------

S&P 500 Net Return Index	996,851	636,342
--------------------------	---------	---------

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts

AGF American Growth Class (Note 1)

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	1,989,977	-	1,989,977	99.9

September 30, 2020

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	1,375,220	-	1,375,220	100.1

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$39,800,000 (September 30, 2020 — \$27,504,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

As at September 30, 2021, the total fair value of private and/or restricted securities held within the Fund represented approximately \$1,839,000 (September 30, 2020 – \$4,863,000).

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 35 percent change in benchmark (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Impact on Net Assets (\$'000)

Benchmark	September 30, 2021	September 30, 2020
S&P/TSX Composite Index	231,531	95,196

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts

AGF Canadian Growth Equity Class (Note 1)

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	21,793	-	21,793	3.8

September 30, 2020

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	50,592	-	50,592	9.5

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$436,000 (September 30, 2020 – \$1,012,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION

Investment Objective

The Fund's investment objective is to provide long-term capital growth by investing primarily in stocks and bonds of companies based in China, or in companies that will benefit from economic development and growth in the People's Republic of China.

Summary of Investment Portfolio

As at September 30, 2021 and 2020, the Fund's major portfolio categories, as a percentage of Net Assets, are included in the following tables:

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 45 percent change in benchmark (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Impact on Net Assets (\$'000)

Benchmark	September 30, 2021	September 30, 2020
-----------	--------------------	--------------------

MSCI China Free Index	28,852	27,486
-----------------------	--------	--------

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

The accompanying notes are an integral part of these financial statements.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)
		Total**		
Hong Kong Dollar	45,519	-	45,519	67.6
United States Dollar	19,057	-	19,057	28.3
New Taiwanese Dollar	1,534	-	1,534	2.3
South Korean Won	1,050	-	1,050	1.6

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)
		Total**		
Hong Kong Dollar	48,794	-	48,794	61.7
United States Dollar	26,174	-	26,174	33.1
New Taiwanese Dollar	2,893	-	2,893	3.7
South Korean Won	1,360	-	1,360	1.7

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$1,343,000 (September 30, 2020 – \$1,584,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

September 30, 2021

(\$'000)		Level 1	Level 2	Level 3	Total

Investments in Underlying Funds	-	-	-	-
Total Investments	18,225	59,271	-	77,496
Derivative Assets	-	-	-	-
Derivative Liabilities	-	-	-	-

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$32,316,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

SECURITIES LENDING TRANSACTIONS (Note 2)

A reconciliation of the gross amount generated from securities lending transactions to the securities lending income earned by the Fund for the periods ended September 30, 2021 and 2020 is as follows:

	September 30, 2021		September 30, 2020

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Underlying Fund had no significant investments in debt instruments and derivatives. Accordingly, the Underlying Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Underlying Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Underlying Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by asset type.

The impact on Net Assets of the Fund due to a 25 percent change in benchmark (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets ('000)	
	September 30,	
	2021	2020
MSCI Emerging Markets Index	21,333	9,616

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

As at September 30, 2021 and 2020, the Fund did not have a significant direct exposure to currency risk.

The amounts in the following tables are based on the fair value of the Underlying Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Underlying Fund to significant currency risk.

Currencies to which the Underlying Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, the Fund's Net Assets would have decreased or increased, respectively, by approximately \$1,652,000 (September 30, 2020 – \$1,248,000) as a result of the Underlying Fund's exposure to currency risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 45 percent change in benchmark (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI Europe Index	35,620	22,885

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)
		Total**		
Euro Currency	42,747	-	42,747	66.7
Pound Sterling	12,570	-	12,570	19.6
Swiss Franc	8,198	-	8,198	12.8
United States Dollar	471	-	471	0.7

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)

Swiss Franc	8,978	-	8,978	15.9
United States Dollar	185	-	185	0.3

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$1,280,000 (September 30, 2020 – \$1,118,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$54,425,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, the Fund's Net Assets would have increased or decreased, respectively, by approximately \$2,177,000 (September 30, 2020 – \$1,817,000) as a result of the Underlying Fund's exposure to interest rate risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by asset type.

The impact on Net Assets of the Fund due to a 15 percent change in benchmark (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index)	21,282	22,529

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

As at September 30, 2021 and 2020, the Fund did not have a significant direct exposure to currency risk.

The amounts in the following tables are based on the fair value of the Underlying Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Underlying Fund to significant currency risk.

Currencies to which the Underlying Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

	Financial Instruments	Forward Contracts	Total**	% of Underlying Fund's Net Assets
(\$'000)				
United States Dollar	132,955	(65,205)	67,750	4.1
Swiss Franc	5,232	–	5,232	0.3
Indonesian Rupiah	1,736	–	1,736	0.1
Australian Dollar	3,516	(3,205)	311	0.0

September 30, 2020

	Financial Instruments	Forward Contracts	Total**	% of Underlying Fund's Net Assets
(\$'000)				
United States Dollar	136,955	(116,241)	20,714	1.3
Mexican Peso	7,474	–	7,474	0.5
Australian Dollar	3,780	–	3,780	0.2
Indonesian Rupiah	1,760	–	1,760	0.1
Euro Currency	567	–	567	0.0

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, the Fund's Net Assets would have decreased or increased, respectively, by approximately \$119,000 (September 30, 2020 – \$45,000) as a result of the Underlying Fund's exposure to currency risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Underlying Fund had no significant investments in debt instruments and derivatives. Accordingly, the Underlying Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Underlying Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Underlying Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by asset type.

The impact on Net Assets of the Fund due to a 45 percent change in benchmarks (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Impact on Net Assets (\$'000)

Benchmark	September 30,	September 30,	
	2021	2020	
MSCI World Index	43,865	24,554	
MSCI All Country World Index	44,899	24,880	

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

As at September 30, 2021 and 2020, the Fund did not have a significant direct exposure to currency risk.

The amounts in the following tables are based on the fair value of the Underlying Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Underlying Fund to significant currency risk.

Currencies to which the Underlying Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	% of Underlying Fund's Net Assets

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, the Fund's Net Assets would have decreased or increased, respectively, by approximately \$2,407,000 (September 30, 2020 – \$1,758,000) as a result of the Underlying Fund's exposure to currency risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 40 percent change in benchmark (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI All Country World Index	270,548	263,815

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities

(including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Forward Contracts	Foreign Exchange	
			Total**	Percentage of Net Assets (%)

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$268,021,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Net Assets (%)		September 30, 2021	September 30, 2020	Impact on Net Assets (\$'000)
	2021	2020			
AAA	2.3	1.2			
A	4.0	4.9			
BBB	1.0	3.3			
BB	4.9	3.2			
B	1.5	2.1			
CCC	—	1.1			
Not Rated	0.9	1.0			

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	(\$'000)		September 30, 2021	September 30, 2020	Impact on Net Assets (\$'000)
	2021	2020			
Less than 1 year	—	—			
1-3 years	3,225	3,225			
3-5 years	3,971	4,971			
Greater than 5 years	5,006	3,552			

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, Net Assets would have increased or decreased, respectively, by approximately \$63,000 (September 30, 2020 – \$81,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 20 percent change in benchmark (September 30, 2020 – 5 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Blended Benchmark	22,445	5,133

The Blended Benchmark is composed of 25% S&P Global Infrastructure Net Index, 20% MSCI World Materials Net Index, 20% MSCI World Real Estate Net Index, 15% MSCI World Energy Net Index, 10% ICE BofA US Inflation Linked Treasury Index and 10% S&P/TSX Global Gold Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) and investments in commodities as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$16,896,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

The following tables reconcile the Fund's level 3 fair value measurements for the periods ended September 30, 2021 and 2020. The level 3 positions held in the Fund were not considered significant.

DISCUSSION OF FINANCIAL INSTRUMENT RISK

MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Underlying Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Underlying Fund's Net Assets (%)	
	September 30, 2021	September 30, 2020
AAA	-	25.8
AA	0.1	(0.1)
A	12.5	5.6
BBB	14.9	17.6
BB	3.5	6.3
B	1.4	5.5
CCC	-	2.8
Not Rated	5.1	2.4

Interest Rate Risk

As at September 30, 2021 and 2020, the Underlying Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	September 30, 2021	September 30, 2020
Less than 1 year	-	1,805
1-3 years	1,875	7,729
3-5 years	10,866	24,376
Greater than 5 years	22,999	44,365

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, the Fund's Net Assets would have increased or decreased, respectively, by approximately \$222,000 (September 30, 2020 - \$376,000) as a result of the Underlying Fund's exposure to interest rate risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by asset type.

The impact on Net Assets of the Fund due to a 15 percent change in benchmarks (September 30, 2020 - 20 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index)	6,836	7,983
Blended Benchmark	6,921	7,915

The Blended Benchmark is composed of 50% Bloomberg Canada Aggregate Index, 25% Bloomberg U.S. Corporate High-Yield Bond Index (local\$) (formerly, Bloomberg Barclays U.S. Corporate High-Yield Bond Index (local\$)), 15% MSCI All Country World Index (local\$) and 10% S&P/TSX Composite Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Currency Risk

As at September 30, 2021 and 2020, the Fund did not have a significant direct exposure to currency risk.

The amounts in the following tables are based on the fair value of the Underlying Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Underlying Fund to significant currency risk.

Currencies to which the Underlying Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		% of Underlying Fund's Net Assets
		Total**		
United States Dollar	60,626	(18,399)	42,227	32.1

Indonesian Rupiah	155	-	155	0.1
Pound Sterling	1,177	(1,094)	83	0.1

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, the Fund's Net Assets would have decreased or increased, respectively, by approximately \$540,000 (September 30, 2020 – \$87,000) as a result of the Underlying Fund's exposure to currency risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION

Investment Objective

The Fund's investment objective is to provide superior returns with reasonable risk through a combination of dividends and capital growth from Canadian companies and interest income. The Fund may also invest in foreign equities, which are typically not expected to exceed 49.0% of the Net Asset Value of the Fund at the time of purchase. The Fund primarily invests in units of the Underlying Fund.

Summary of Investment Portfolio

As at September 30, 2021 and 2020, the Underlying Fund's major portfolio categories, as a percentage of the Underlying Fund's Net Assets, are included in the following tables. The Fund is indirectly exposed to these portfolio categories as a result of investing substantially all of its assets in units of the Underlying Fund.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Underlying Fund had no significant investments in debt instruments and derivatives. Accordingly, the Underlying Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Underlying Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Underlying Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by asset type.

The impact on Net Assets of the Fund due to a 30 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Effective July 1, 2021, the Fund's primary benchmark, S&P/TSX Composite Index, and secondary benchmark, S&P/TSX 60 Index, were changed to S&P/TSX Composite Dividend Index to better reflect the investment opportunity set of the Fund.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
S&P/TSX Composite Dividend Index	40,904	N/A
S&P/TSX Composite Index	N/A	13,611
S&P/TSX 60 Index	N/A	14,895

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

As at September 30, 2021 and 2020, the Fund did not have a significant direct exposure to currency risk.

The amounts in the following tables are based on the fair value of the Underlying Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Underlying Fund to significant currency risk.

Currencies to which the Underlying Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, the Fund's Net Assets would have decreased or increased, respectively, by approximately \$872,000 (September 30, 2020 – \$1188,000) as a result of the Underlying Fund's exposure to currency risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION

Investment Objective

The Fund's investment objective is to provide maximum income while preserving capital and liquidity by investing primarily in short-term instruments, government guaranteed securities and corporate paper with a minimum A credit rating. The Fund may also invest in foreign securities, which are typically not expected to exceed 49.0% of the Net Asset Value of the Fund at the time of purchase.

Summary of Investment Portfolio

As at September 30, 2021 and 2020, the Fund's major portfolio categories, as a percentage of Net Assets, are included in the following tables:

Portfolio by Sector

September 30, 2021	(%)
Corporate Bonds	48.6
Provincial Bonds	23.9
Government Bonds	12.0
Government Guaranteed Investments	11.1
Supranational Bonds	0.7

September 30, 2020	(%)
Corporate Bonds	57.2
Provincial Bonds	16.1
Government Bonds	15.7
Government Guaranteed Investments	8.4
Supranational Bonds	1.8

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Net Assets (%)	
	September 30, 2021	September 30, 2020
AAA	24.7	27.1
AA	17.6	18.6
A	39.6	37.1
BBB	16.2	16.7

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	September 30, 2021	September 30, 2020
Less than 1 year	2,378	1,300
1-3 years	16,912	8,535
3-5 years	9,022	12,334
Greater than 5 years	1,715	4,821

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, Net Assets would have increased or decreased, respectively, by approximately \$185,000 (September 30, 2020 – \$221,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 10 percent change in benchmark (September 30, 2020 – 10 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Canadian Aggregate 1-5 Year Index (formerly, Bloomberg Barclays Canadian Aggregate 1-5 Year Index)	3,255	2,844

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

As at September 30, 2021 and 2020, the Fund did not have significant exposure to currency risk.

C	0.2	0.3
D	0.2	-
Not Rated	9.9	6.3

Interest Rate Risk

As at September 30, 2021 and 2020, the Underlying Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	September 30, 2021	September 30, 2020
Less than 1 year	36,497	197,641
1-3 years	582,718	347,430
3-5 years	477,327	523,250
Greater than 5 years	917,562	936,814

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, the Fund's Net Assets would have increased or

AGF Total Return Bond Class (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

decreased, respectively, by approximately \$3,593,000 (September 30, 2020 – \$2,688,000) as a result of the Underlying Fund's exposure to interest rate risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by asset type.

The impact on Net Assets of the Fund due to a 10 percent change in benchmarks (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Effective March 1, 2021, the Fund's Old Blended Benchmark, which is composed of 40% Bloomberg Barclays Emerging Markets USD Aggregate Index, 40% Bloomberg Barclays Global High-Yield Index and 20% Bloomberg Barclays Global Aggregate Index, was changed to the Blended Benchmark (as defined below) to better reflect the currency exposure of the Fund.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Global High-Yield Index (formerly, Bloomberg Barclays Global High-Yield Index)	19,756	27,661
Blended Benchmark	22,216	N/A
Old Blended Benchmark	N/A	30,493

The Blended Benchmark is composed of 40% Bloomberg Emerging Markets USD Aggregate Index (hedged to CAD) (formerly, Bloomberg Barclays Emerging Markets USD Aggregate Index (hedged to CAD)), 40% Bloomberg Global High-Yield Index (hedged to CAD) and 20% Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index).

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

As at September 30, 2021 and 2020, the Fund did not have a significant direct exposure to currency risk.

The amounts in the following tables are based on the fair value of the Underlying Fund's financial instruments (including cash and cash equivalents) as well as the

underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Underlying Fund to significant currency risk.

Currencies to which the Underlying Fund had exposure as at September 30, 2021 and 2020, were as follows:

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 55 percent change in benchmark (September 30, 2020 – 50 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Impact on Net Assets (\$'000)		
	September 30, 2021	September 30, 2020
Benchmark		
S&P 500 Net Return Index	505,677	320,151

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange		Percentage of Net Assets (%)
		Forward Contracts	Total**	
United States Dollar	1,063,436	(161,422)	902,014	83.7

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange		Percentage of Net Assets (%)
		Forward Contracts	Total**	
United States Dollar	767,720	(114,629)	653,091	84.2

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$18,040,000 (September 30, 2020 – \$13,062,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 35 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI All Country World Index	43,048	15,246
Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index)	(30,276)	(8,077)
Blended Benchmark	72,657	25,803

The Blended Benchmark is composed of 45% MSCI All Country World Index, 30% Bloomberg Global Aggregate Index, 15% S&P/TSX Composite Index and 10% Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index).

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	11,767	(6,126)	5,641	2.8

September 30, 2020

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	-	(4,609)	(4,609)	(2.8)

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$113,000 (September 30, 2020 - increased or decreased by approximately \$92,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 15 percent change in benchmarks (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index)	16,703	21,630
MSCI All Country World Index	9,516	11,435
Blended Benchmark	22,010	26,143

The Blended Benchmark is composed of 36% Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index), 30% MSCI All Country World Index, 24% Bloomberg Canada Aggregate Index and 10% S&P/TSX Composite Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	6,362	(4,449)	1,913	1.4

September 30, 2020

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	-	(3,421)	(3,421)	(2.8)

**** Includes both monetary and non-monetary instruments, as applicable**

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$38,000 (September 30, 2020 - increased or decreased by approximately \$68,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 40 percent change in benchmarks (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)
September 30, 2021	September 30, 2020
MSCI All Country World Index	6,178
S&P/TSX Composite Index	4,567

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as

The accompanying notes are an integral part of these financial statements.

AGF Elements Global Portfolio Class (Note 1)

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

		Foreign Exchange		Percentage of Net Assets (%)
(\$'000)	Financial Instruments	Forward Contracts	Total**	
United States Dollar	1,902	(358)	1,544	9.0

September 30, 2020

		Foreign Exchange		Percentage of Net Assets (%)
(\$'000)	Financial Instruments	Forward Contracts	Total**	
United States Dollar	-	(224)	(224)	(1.5)

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$31,000 (September 30, 2020 - increased or decreased by approximately \$4,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 35 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI All Country World Index	11,344	4,271
Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index)	(9,235)	(2,739)
Blended Benchmark	14,594	5,512

The Blended Benchmark is composed of 72% MSCI All Country World Index, 20% Bloomberg Global Aggregate Index and 8% S&P/TSX Composite Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

(\$'000)	Foreign Exchange			Percentage of Net Assets (%)
	Financial Instruments	Forward Contracts	Total**	
United States Dollar	3,384	(874)	2,510	6.0

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Total**		Percentage of Net Assets (%)
			Total	Net Assets (%)	
United States Dollar	-	-	(718)	(718)	(2.0)

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$50,000 (September 30, 2020 - increased or decreased by approximately \$14,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 10 percent change in benchmarks (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Shares as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Shares, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index)	(9,270)	(4,862)
MSCI All Country World Index	25,530	38,314
Blended Benchmark	58,372	83,069

The Blended Benchmark is composed of 60% Bloomberg Global Aggregate Index, 15% Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index), 15% MSCI All Country World Index and 10% S&P/TSX Composite Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Percentage of	
			Total**	Net Assets (%)
United States Dollar	28,192	(22,217)	5,975	0.9

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Percentage of	
			Total**	Net Assets (%)
United States Dollar	-	(18,759)	(18,759)	(3.7)

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$120,000 (September 30, 2020 - increased or decreased by approximately \$375,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 55 percent change in benchmark (September 30, 2020 – 50 percent), using historical correlation between the returns of the Series S Units (up to February 21, 2019) and Series I Units (effective February 22, 2019) as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used.

Impact on Net Assets (\$'000)

Benchmark	September 30, 2021	September 30, 2020
S&P 500 Net Return Index	182,425	112,456

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

AGF American Growth Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
			Total**	Net Assets (%)
United States Dollar	362,310	-	362,310	100.1

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
			Total**	Net Assets (%)
United States Dollar	235,609	-	235,609	97.4

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$7,246,000 (September 30, 2020 – \$4,712,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

AGFiQ Canadian Dividend Income Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION

Investment Objective

The Fund's investment objective is to provide investors with long-term capital appreciation along with the potential for monthly income, primarily through investing in high dividend yielding shares trading on Canadian stock exchanges. The Fund may also invest in money market instruments and fixed income investments issued by corporations and governments of Canada. The maximum exposure to investments in foreign markets is 30.0% at the time of purchase.

Summary of Investment Portfolio

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 30 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Effective July 1, 2021, the Fund's primary benchmark, S&P/TSX Composite Index, and secondary benchmark, S&P/TSX 60 Index, were changed to S&P/TSX Composite Dividend Index to better reflect the investment opportunity set of the Fund.

AGFiQ Canadian Dividend Income Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
S&P/TSX Composite Dividend Index	513,475	N/A
S&P/TSX Composite Index	N/A	189,486
S&P/TSX 60 Index	N/A	207,860

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Foreign			Percentage of Net Assets (%)
	Financial Instruments	Exchange Forward Contracts	Total**	
United States Dollar	455,804	(204,306)	251,498	13.1

September 30, 2020

(\$'000)	Foreign			Percentage of Net Assets (%)
	Financial Instruments	Exchange Forward Contracts	Total**	
United States Dollar	447,488	-	447,488	28.6

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$5,030,000 (September 30, 2020 — \$8,950,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

AGF Canadian Money Market Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION

Investment Objective

The Fund's investment objective is to provide maximum income, while preserving capital and liquidity by investing primarily in Canadian money market instruments, such as Canadian treasury bills.

Summary of Investment Portfolio

As at September 30, 2021 and 2020, the Fund's major portfolio categories, as a percentage of Net Assets, are included in the following tables:

Portfolio by Sector

September 30, 2021	(%)
Treasury Bills	47.3
Bankers' Acceptances	23.3
Government Guaranteed Investments	12.8
Promissory Notes	8.6
Short-Term Deposits	2.2

September 30, 2020	(%)
Treasury Bills	80.9
Bankers' Acceptances	9.5
Promissory Notes	5.5
Short-Term Deposits	2.0
Government Guaranteed Investments	1.3
Corporate Bonds	0.8

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK

MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Net Assets (%)	
	September 30, 2021	September 30, 2020
AAA	42.2	58.7
AA	25.3	22.1
A	32.4	19.2

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	(\$'000)	
	September 30, 2021	September 30, 2020
Less than 1 year	120,870	160,257
1-3 years	-	-
3-5 years	-	-
Greater than 5 years	-	-

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

The Fund has minimal fair value sensitivity to changes in interest rates, since securities are usually held to maturity and tend to be short-term in nature.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 5 percent change in benchmark (September 30, 2020 – 10 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Effective September 1, 2019, the Fund's benchmark was changed from FTSE Canada 91 Day T-Bill Index to Bloomberg Barclays Canada 1-3 Month T-Bill Index as a result of a change in index provider. However, the Bloomberg Barclays Canada 1-3 Month T-Bill Index was launched on May 1, 2019 and performance for this benchmark is therefore not available prior to this date.

The analyses as at September 30, 2021 and 2020 have been completed based on the Fund's historical correlation with the old benchmark for the period prior to September 1, 2019 and its correlation with the new benchmark for the period thereafter.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Canada 1-3 Month T-Bill Index (formerly, Bloomberg Barclays Canada 1-3 Month T-Bill Index)	524	1,338

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

United States Equity	3.8
International Equity	0.7
September 30, 2020	(%)
Canadian Equity	97.1

As of September 30, 2021, the Fund did not hold any private and/or restricted securities. As at September 30, 2020, the total fair value of private and/or restricted securities held within the Fund represented approximately \$246,000.

Interest in Unconsolidated Structured Entities (Note 2)

The Fund's investment details in the exchange traded funds as at September 30, 2021 are included in the following table. As at September 30, 2020, the Fund had no investments in underlying funds or exchange traded funds.

	Fair Value of Fund's Investment (\$'000)	% of ETF's Net Assets
Vanguard Small-Cap ETF	4,155	0.0

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 30 percent change in benchmark (September 30, 2020 – 10 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
S&P/TSX Small Cap Index	47,210	9,668

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

AGF Canadian Small Cap Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)
		Total	**	
United States Dollar	12,977	-	12,977	5.8

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)
		Total	**	
United States Dollar	3,029	-	3,029	2.3

**** Includes both monetary and non-monetary instruments, as applicable**

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$260,000 (September 30, 2020 – \$61,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

September 30, 2021

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 25 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30,	
	2021	2020
J.P. Morgan GBIEM Global Diversified Index	68,695	29,189
Blended Benchmark	83,496	40,841

The Blended Benchmark is composed of 40% J.P. Morgan GBIEM Global Diversified Index, 35% J.P. Morgan CEMBI Broad Diversified Index and 25% J.P. Morgan EMBI Global Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

AGF Emerging Markets Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS – FUND SPECIFIC INFORMATION CONTINUED

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 25 percent change in benchmark (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI Emerging Markets Index	291,445	169,234

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the

period ended September 30, 2020, non-North American equities of approximately \$671,397,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by asset type.

The impact on Net Assets of the Fund due to a 35 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's

benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
S&P/TSX Composite Index	88,975	33,038
Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index)	134,965	55,936
Blended Benchmark	167,358	62,436

The Blended Benchmark is composed of 25% Bloomberg Canada Aggregate Index, 25% Bloomberg Global High-Yield Index (formerly, Bloomberg Barclays Global High-Yield Index), 25% MSCI All Country World Index and 25% S&P/TSX Composite Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

The Fund is indirectly exposed to credit, interest rate and currency risks, as applicable, of the underlying funds as at September 30, 2021 and 2020.

AGF European Equity Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION

Investment Objective

The Fund's investment objective is to provide long-term capital growth by investing primarily in shares of companies operating mainly in Europe and that trade on European stock exchanges.

Summary of Investment Portfolio

As at September 30, 2021 and 2020, the Fund's major portfolio categories, as a percentage of Net Assets, are included in the following tables:

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 45 percent change in benchmark (September 30, 2020 – 35 percent), using historical correlation between the return of the Series S Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used.

Impact on Net Assets (\$'000)

September 30, 2021 September 30, 2020

Benchmark	2021	2020
MSCI Europe Index	34,737	23,716

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

The accompanying notes are an integral part of these financial statements.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)
		Total**		
Euro Currency	42,661	-	42,661	65.8
Pound Sterling	13,054	-	13,054	20.1
Swiss Franc	8,195	-	8,195	12.6
United States Dollar	603	-	603	0.9

September 30, 2020

Swiss Franc	10,302	-	10,302	17.2
United States Dollar	1,186	-	1,186	2.0

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$1,290,000 (September 30, 2020 — \$1,189,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

September 30, 2021

(\$'000)		Level 1	Level 2	Level 3	Total

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$56,613,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

SECURITIES LENDING TRANSACTIONS (Note 2)

A reconciliation of the gross amount generated from securities lending transactions to the securities lending income earned by the Fund for the periods ended September 30, 2021 and 2020 is as follows:

	September 30, 2021		September 30, 2020

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Net Assets (%)	
	September 30, 2021	September 30, 2020
AAA	26.8	27.2
AA	6.3	5.9
A	20.4	24.4
BBB	30.7	28.2
BB	4.6	2.7
B	2.1	2.8
CCC	0.8	0.9
Not Rated	2.0	3.2

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	(\$'000)	
	September 30, 2021	September 30, 2020
Less than 1 year	14,429	10,050

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

AGF Fixed Income Plus Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, Net Assets would have increased or decreased, respectively, by approximately \$27,407,000 (September 30, 2020 – \$27,894,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 15 percent change in benchmark (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index)	267,138	346,102

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Percentage of Net Assets (%)	
			Total**	Net Assets (%)
United States Dollar	132,955	(65,205)	67,750	4.1
Swiss Franc	5,232	–	5,232	0.3
Indonesian Rupiah	1,736	–	1,736	0.1
Australian Dollar	3,516	(3,205)	311	0.0

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Percentage of Net Assets (%)	
			Total**	Net Assets (%)
United States Dollar	136,955	(116,241)	20,714	1.3

Australian Dollar	3,780	–	3,780	0.2
Indonesian Rupiah	1,760	–	1,760	0.1
Euro Currency	567	–	567	0.0

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$1,501,000 (September 30, 2020 – \$686,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Net Assets (%)	
	September 30, 2021	September 30, 2020
AA	6.4	6.0
A	(0.8)	(0.2)
BBB	3.1	4.5
BB	22.3	21.9
B	57.4	53.1
CCC	8.2	9.0
D	1.0	0.6
Not Rated	5.4	6.5

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	(\$'000)	
	September 30, 2021	September 30, 2020
Less than 1 year	525	3,092
1-3 years	21,896	26,678
3-5 years	54,937	120,778
Greater than 5 years	99,823	110,385

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, Net Assets would have increased or decreased, respectively, by approximately \$659,000 (September 30, 2020 – \$912,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 10 percent change in benchmark (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The

returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Effective July 1, 2021, the Fund's primary benchmark was changed from S&P/LSTA Leveraged Loan Index to S&P/LSTA Leveraged Loan CAD-Hedged Index to better reflect the currency exposure of the Fund.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
S&P/LSTA Leveraged Loan CAD-Hedged Index	17,221	N/A
S&P/LSTA Leveraged Loan Index	N/A	40,450

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Forward Contracts	Foreign Exchange	
			Total**	Percentage of Net Assets (%)
United States Dollar	186,818	(179,177)	7,641	4.2

September 30, 2020

(\$'000)	Financial Instruments	Forward Contracts	Foreign Exchange	
			Total**	Percentage of Net Assets (%)
United States Dollar	275,539	(268,307)	7,232	2.7

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$153,000 (September 30, 2020 – \$145,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021, the Fund held cash and cash equivalents of approximately 12.5% of Net Assets, which were deposited with an A-rated financial institution. As at September 30, 2020, all assets of the Fund were invested in cash and cash equivalents.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

As at September 30, 2021, the Fund held cash and cash equivalents which were subject to fluctuations in the prevailing levels of market interest rates. If market interest

The accompanying notes are an integral part of these financial statements.

AGFiQ Global Balanced ETF Portfolio Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

rates had changed by 25 basis points, with all other variables held constant, interest income would have changed by approximately \$1,000. As at September 30, 2020, all assets of the Fund were invested in cash and cash equivalents.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 20 percent change in benchmark, using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

As at September 30, 2020, the Fund had not yet commenced operations. Accordingly, the Fund had no exposure to other price risk as all assets were invested in cash and cash equivalents.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Blended Benchmark	613	N/A

The Blended Benchmark is composed of 60% MSCI All Country World Index and 40% Bloomberg Multiverse Index (hedged to CAD) (formerly, Bloomberg Barclays Multiverse Index (hedged to CAD)).

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following table are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	1,197	(512)	685	22.8

**** Includes both monetary and non-monetary instruments, as applicable**

As at September 30, 2021, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$14,000. As at September 30, 2020, the Fund did not have significant exposure to currency risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following table illustrates the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021. As at September 30, 2020, all assets of the Fund were invested in cash and cash equivalents.

September 30, 2021

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Net Assets (%)	
	September 30, 2021	September 30, 2020
AA	0.0	(0.1)
A	10.9	10.8
BBB	7.7	9.7
BB	12.6	10.2
B	9.4	5.9
CCC	0.9	0.0
Not Rated	53.9	57.7

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	(\$'000)	
	September 30, 2021	September 30, 2020
Less than 1 year	13,862	8,389
1-3 years	84,636	43,311
3-5 years	140,171	60,994
Greater than 5 years	38,694	25,267

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, Net Assets would have increased or decreased, respectively, by approximately \$3,000,000 (September 30, 2020 – \$1,591,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 10 percent change in benchmark (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Global Convertibles Index (formerly, Bloomberg Barclays Global Convertibles Index)	29,092	29,660

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Foreign Exchange			Percentage of Net Assets (%)
	Financial Instruments	Forward Contracts	Total**	
United States Dollar	282,735	(249,303)	33,432	9.2

Japanese Yen	2,230	–	2,230	1.2
Swiss Franc	1,903	–	1,903	1.0

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$1,075,000 (September 30, 2020 – \$676,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

During the period ended September 30, 2020, investments of approximately \$3,100,000 were transferred into level 3 from level 2 due to a change in valuation requiring the use of unobservable inputs.

The Manager utilizes a variety of valuation techniques in determining the fair value of securities classified as level 3, including the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other techniques commonly used by market participants. The key inputs used in the valuation techniques may vary time to time depending on company specific factors and economic or market conditions. As at September 30, 2021, if the value of the level 3 investments increased or decreased by 10 percent, Net Assets would have increased or decreased, respectively, by approximately \$376,000 (September 30, 2020 - \$223,000).

SECURITIES LENDING TRANSACTIONS (Note 2)

A reconciliation of the gross amount generated from securities lending transactions to the securities lending income earned by the Fund for the periods ended September 30, 2021 and 2020 is as follows:

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Net Assets (%)	
	September 30, 2021	September 30, 2020
AAA	5.0	—
AA	(0.0)	(0.1)
A	1.4	12.8
BBB	5.1	11.4
BB	40.3	29.5
B	30.8	25.7
CCC	5.7	11.0
Not Rated	5.4	6.2

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	(\$'000)	
	September 30, 2021	September 30, 2020
Less than 1 year	36,315	1,001
1-3 years	36,715	31,686
3-5 years	140,488	102,366
Greater than 5 years	329,700	207,038

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, Net Assets would have increased or decreased, respectively, by approximately \$4,337,000 (September 30, 2020 – \$3,163,000).

As at September 30, 2021, the Fund did not hold any significant cash and cash equivalents. As at September 30, 2020, the Fund held cash and cash equivalents which were subject to fluctuations in the prevailing levels of market interest rates. If market interest rates had changed by 25 basis points, with all other variables held constant, interest income would have changed by approximately \$123,000.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 10 percent change in benchmarks (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual

Fund Units as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg U.S. Corporate High-Yield Bond Index (formerly, Bloomberg Barclays U.S. Corporate High-Yield Bond Index)	66,453	87,522
Bloomberg U.S. Corporate High-Yield Bond Index (hedged to CAD)	58,915	80,941

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Foreign Exchange Forward Contracts			Percentage of Net Assets (%)

AGF Global Corporate Bond Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$1,099,000 (September 30, 2020 – \$380,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 45 percent change in benchmarks (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI World Index	933,230	685,420
MSCI All Country World Index	955,047	694,364

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for

securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$761,089,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 40 percent change in benchmark (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI All Country World Index	225,491	165,900

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for

securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Forward Contracts	Foreign Exchange

Derivative Assets	-	-	-	-
Derivative Liabilities	-	-	-	-

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$167,773,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

SECURITIES LENDING TRANSACTIONS (Note 2)

A reconciliation of the gross amount generated from securities lending transactions to the securities lending income earned by the Fund for the periods ended September 30, 2021 and 2020 is as follows:

AGF Global Growth Balanced Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS – FUND SPECIFIC INFORMATION

Investment Objective

The Fund's investment objective is to provide superior returns with moderate risk through a combination of capital appreciation and interest income by investing primarily in a mix of shares of companies in countries and industries that are expected to have superior growth, bonds and short-term money market instruments.

Summary of Investment Portfolio

As at September 30, 2021 and 2020, the Fund's major portfolio categories, as a percentage of Net Assets, are included in the following tables:

Portfolio by Sector

September 30, 2021	(%)
Equity Funds	75.6
Fixed Income Funds	23.4
September 30, 2020	(%)
Equity Funds	73.2
Fixed Income Funds	25.7

Interest in Unconsolidated Structured Entities (Note 2)

The Fund's investment details in the underlying funds as at September 30, 2021 and 2020 are included in the following tables:

September 30, 2021	Fair Value of Fund's Investment (\$'000)	% of Underlying Fund's Net Assets
AGF Global Select Fund	279,410	13.6
AGF Total Return Bond Fund	93,933	4.4
AGF Global Dividend Fund	24,104	0.9
September 30, 2020	Fair Value of Fund's Investment (\$'000)	% of Underlying Fund's Net Assets
AGF Global Select Fund	150,479	20.6
AGF Total Return Bond Fund	52,827	2.4

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by asset type.

The impact on Net Assets of the Fund due to a 40 percent change in benchmarks (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI All Country World Index	114,792	49,620
Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index)	(81,399)	(26,811)
Blended Benchmark	172,542	74,503

The Blended Benchmark is composed of 70% MSCI All Country World Index and 30% Bloomberg Global Aggregate Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

The Fund is indirectly exposed to credit, interest rate and currency risks, as applicable, of the underlying funds as at September 30, 2021 and 2020.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 5 percent change in benchmark, using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

As at September 30, 2020, the Fund had not yet commenced operations. Accordingly, the Fund had no exposure to other price risk as all assets were invested in cash and cash equivalents.

	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Benchmark		
Bloomberg Global Aggregate Index (hedged to CAD) (formerly, Bloomberg Barclays Global Aggregate Index (hedged to CAD))	50	N/A

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following table are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending

AGFiQ Global Income ETF Portfolio Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021, were as follows:

September 30, 2021

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	117	-	117	9.4

**** Includes both monetary and non-monetary instruments, as applicable**

As at September 30, 2021, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$2,000. As at September 30, 2020, the Fund did not have significant exposure to currency risk.

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following table illustrates the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021. As at September 30, 2020, all assets of the Fund were invested in cash and cash equivalents.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION

Investment Objective

The Fund's investment objective is to provide portfolio diversification and long-term capital growth through investing primarily in equity and equity-related securities of companies operating in industries and sectors associated with real assets and located around the world. Real assets include, but are not limited to, infrastructure, energy, precious metals and real estate.

Summary of Investment Portfolio

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Net Assets (%)	
	September 30, 2021	September 30, 2020
AAA	2.3	1.1
A	3.4	1.1
BBB	1.2	3.6
BB	5.4	3.6
B	1.6	1.9
CCC	-	1.3
Not Rated	1.1	1.1

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	(\$'000)	
	September 30, 2021	September 30, 2020
Less than 1 year	-	-
1-3 years	1,935	2,218
3-5 years	2,325	3,195
Greater than 5 years	3,407	2,411

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, Net Assets would have increased or decreased, respectively, by approximately \$39,000 (September 30, 2020 – \$55,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 20 percent change in benchmark (September 30, 2020 – 5 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three

years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Blended Benchmark	11,236	2,661

The Blended Benchmark is composed of 25% S&P Global Infrastructure Net Index, 20% MSCI World Materials Net Index, 20% MSCI World Real Estate Net Index, 15% MSCI World Energy Net Index, 10% ICE BofA US Inflation Linked Treasury Index and 10% S&P/TSX Global Gold Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) and investments in commodities as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments and Commodities	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	35,429	-	35,429	53.9

Australian Dollar	1,498	-	1,498	2.4
Swiss Franc	769	-	769	1.2

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$990,000 (September 30, 2020 – \$835,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$11,170,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

SECURITIES LENDING TRANSACTIONS (Note 2)

A reconciliation of the gross amount generated from securities lending transactions to the securities lending income earned by the Fund for the periods ended September 30, 2021 and 2020 is as follows:

	September 30, 2021	September 30, 2020

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021, the Fund held cash and cash equivalents of approximately 12.5% of Net Assets, which were deposited with an A-rated financial institution (September 30, 2020 – 19.8%).

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

As at September 30, 2020 and 2021, the Fund held cash and cash equivalents which were subject to fluctuations in the prevailing levels of market interest rates. If market interest rates had changed by 25 basis points, with all other variables held constant, interest income would have changed by approximately \$640,000 (September 30, 2020 - \$362,000).

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 40 percent change in benchmark (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data

AGF Global Select Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI All Country World Index	953,598	310,986

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Percentage of Net Assets (%)	
			Total**	
United States Dollar	1,954,271	-	1,954,271	95.1

Euro Currency	13,785	-	13,785	1.9
Norwegian Krone	11,455	-	11,455	1.6

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets

would have decreased or increased, respectively, by approximately \$41,352,000 (September 30, 2020 – \$14,204,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

September 30, 2021

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$21,592,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund invested in debt instruments, foreign exchange forward contracts, credit default swaps, preferred shares, short-term investments and cash and cash equivalents, as applicable, with the following credit ratings:

Credit Rating	Percentage of Net Assets (%)	
	September 30, 2021	September 30, 2020
AAA	—	25.8
AA	0.1	(0.1)
A	12.5	5.6
BBB	14.9	17.6
BB	3.5	6.3
B	1.4	5.5
CCC	—	2.8
Not Rated	5.1	2.4

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	(\$'000)	
	September 30, 2021	September 30, 2020
Less than 1 year	—	1,805
1-3 years	1,875	7,729
3-5 years	10,866	24,376
Greater than 5 years	22,999	44,365

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, Net Assets would have increased or decreased, respectively, by approximately \$643,000 (September 30, 2020 – \$1,219,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 15 percent change in benchmarks (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index)	19,746	26,126
Blended Benchmark	19,981	25,678

The Blended Benchmark is composed of 50% Bloomberg Canada Aggregate Index, 25% Bloomberg U.S. Corporate High-Yield Bond Index (local\$) (formerly, Bloomberg Barclays U.S. Corporate High-Yield Bond Index (local\$)), 15% MSCI All Country World Index (local\$) and 10% S&P/TSX Composite Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$5,530,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

The following tables reconcile the Fund's level 3 fair value measurements for the periods ended September 30, 2021 and 2020.

Total change in unrealized appreciation (depreciation) for assets held as at September 30, 2020		(333)	

During the period ended September 30, 2020, investments of approximately \$1,192,000 were transferred into level 3 from level 2 due to a change in valuation requiring the use of unobservable inputs.

The Manager utilizes a variety of valuation techniques in determining the fair value of securities classified as level 3, including the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other techniques commonly used by market participants. The key inputs used in the valuation techniques may vary time to time depending on company specific factors and economic or market conditions. As at September 30, 2021, if the value of the level 3 investments increased or decreased by 10 percent, Net Assets would have increased or decreased, respectively, by approximately

\$135,000. As at September 30, 2020, the level 3 positions held in the Fund were not considered significant.

SECURITIES LENDING TRANSACTIONS (Note 2)

A reconciliation of the gross amount generated from securities lending transactions to the securities lending income earned by the Fund for the periods ended September 30, 2021 and 2020 is as follows:

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by geographic region.

The impact on Net Assets of the Fund due to a 45 percent change in benchmark (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI World Net Index	261,672	89,273

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Foreign Exchange Forward Contracts		Total**	Percentage of Net Assets (%)
	Financial Instruments	Forward Contracts		
United States Dollar	273,277	-	273,277	46.3

Norwegian Krone	3,314	-	3,314	1.3
New Taiwanese Dollar	2,836	-	2,836	1.1

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$10,300,000 (September 30, 2020 – \$4,408,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

AGF Global Sustainable Growth Equity Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the period ended September 30, 2020, non-North American equities of approximately \$85,238,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

SECURITIES LENDING TRANSACTIONS (Note 2)

A reconciliation of the gross amount generated from securities lending transactions to the securities lending income earned by the Fund for the periods ended September 30, 2021 and 2020 is as follows:

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

AGFiQ North American Dividend Income Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 30 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Classic Series Units as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Classic Series Units, save for differences in expense structure.

Effective July 1, 2021, the Fund's primary benchmark, S&P/TSX Composite Index, and secondary benchmark, S&P/TSX 60 Index, were changed to S&P/TSX Composite Dividend Index to better reflect the investment opportunity set of the Fund.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
S&P/TSX Composite Dividend Index	347,788	N/A
S&P/TSX Composite Index	N/A	129,907
S&P/TSX 60 Index	N/A	142,177

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$7,394,000 (September 30, 2020 – \$11,299,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

There were no significant transfers between levels 1 and 2 during the period ended September 30, 2021.

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for non-North American equities effective November 4, 2019. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. Where fair value adjustment factors are applied, non-North American equities are classified as level 2. Consequently, during the

period ended September 30, 2020, non-North American equities of approximately \$112,374,000 transferred between level 1 (unadjusted quoted market prices) to level 2 (adjusted market prices).

Reconciliation of Level 3 Fair Value Measurement (Note 4)

For the periods ended September 30, 2021 and 2020, the Fund did not hold financial instruments within level 3 of the fair value hierarchy.

SECURITIES LENDING TRANSACTIONS (Note 2)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION

Investment Objective

The Fund's investment objective is to provide high long-term total investment returns with moderate risk through a combination of long-term capital growth and current income. The Fund invests primarily in a mix of common and preferred shares of Canadian companies, Canadian federal and provincial bonds, high quality corporate bonds and money market instruments.

Summary of Investment Portfolio

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021 and 2020, the Fund had no significant investments in debt instruments and derivatives. Accordingly, the Fund was not subject to significant credit risk.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 35 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
S&P/TSX Composite Index	112,199	48,099
Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index)	168,267	85,491
Blended Benchmark	175,914	74,204

The Blended Benchmark is composed of 60% S&P/TSX Composite Index and 40% Bloomberg Canada Aggregate Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under

securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange		Percentage of Net Assets (%)
		Forward Contracts	Total**	
United States Dollar	67,663	(31,982)	35,681	6.1
South African Rand	4	-	4	0.0
Euro Currency	2	-	2	0.0

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange		Percentage of Net Assets (%)
		Forward Contracts	Total**	
United States Dollar	85,964	-	85,964	14.1
South African Rand	4	-	4	0.0

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$714,000 (September 30, 2020 – \$1,719,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

AGF Total Return Bond Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Interest Rate Risk

As at September 30, 2021 and 2020, the Fund's exposure to debt instruments by maturity was as follows:

Debt Instruments* by Maturity Date	(\$'000)	
	September 30, 2021	September 30, 2020
Less than 1 year	36,497	197,641
1-3 years	582,718	347,430
3-5 years	477,327	523,250
Greater than 5 years	917,562	936,814

* Excludes cash and cash equivalents and preferred shares but includes short-term investments, as applicable

As at September 30, 2021 and 2020, if the yield curve had shifted in parallel by 25 basis points, with all other variables held constant, Net Assets would have increased or decreased, respectively, by approximately \$19,020,000 (September 30, 2020 – \$19,988,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 10 percent change in benchmarks (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Effective March 1, 2021, the Fund's Old Blended Benchmark, which is composed of 40% Bloomberg Barclays Emerging Markets USD Aggregate Index, 40% Bloomberg Barclays Global High-Yield Index and 20% Bloomberg Barclays Global Aggregate Index, was changed to the Blended Benchmark (as defined below) to better reflect the currency exposure of the Fund.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Global High-Yield Index (formerly, Bloomberg Barclays Global High-Yield Index)	104,482	205,465
Blended Benchmark	117,477	N/A
Old Blended Benchmark	N/A	226,139

The Blended Benchmark is composed of 40% Bloomberg Emerging Markets USD Aggregate Index (hedged to CAD) (formerly, Bloomberg Barclays Emerging Markets USD Aggregate Index (hedged to CAD)), 40% Bloomberg Global High-Yield Index (hedged to CAD) and 20% Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index).

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

Interest in Unconsolidated Structured Entities (Note 2)

As at September 30, 2021 and 2020, the Fund had no investments in underlying funds or exchange traded funds.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Credit Risk

As at September 30, 2021, the Fund had no significant investments in debt instruments and derivatives. As at September 30, 2020, the Fund held cash and cash equivalents of approximately 18.3% of Net Assets, which were deposited with an A-rated financial institution.

Interest Rate Risk

The majority of the Fund's financial assets and liabilities are non-interest bearing. Accordingly, the Fund is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

As at September 30, 2021, the Fund did not hold any significant cash and cash equivalents. As at September 30, 2020, the Fund held cash and cash equivalents which were subject to fluctuations in the prevailing levels of market interest rates. If market interest rates had changed by 25 basis points, with all other variables held constant, interest income would have changed by approximately \$139,000.

Other Price Risk

The Schedule of Investment Portfolio of the Fund classifies securities by market segment.

The impact on Net Assets of the Fund due to a 55 percent change in benchmark (September 30, 2020 – 50 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Fund's benchmark, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Fund is less than three years, in which case since inception data has been used. The returns of the other series of the Fund are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
S&P MidCap 400 Index	248,121	143,471

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

AGF U.S. Small-Mid Cap Fund (Note 1)

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Currency Risk

The amounts in the following tables are based on the fair value of the Fund's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including cash collateral received for securities on loan, dividends and interest receivables and receivables for investments sold) and financial liabilities (including payable for cash collateral under securities lending and payable for investments purchased) that are denominated in foreign currencies do not expose the Fund to significant currency risk.

Currencies to which the Fund had exposure as at September 30, 2021 and 2020, were as follows:

September 30, 2021

(\$'000)	Foreign Exchange Forward Contracts			Percentage of Net Assets (%)
	Financial Instruments	Total**	Net Assets (%)	
United States Dollar	521,105	-	521,105	100.6

September 30, 2020

(\$'000)	Foreign Exchange Forward Contracts			Percentage of Net Assets (%)
	Financial Instruments	Total**	Net Assets (%)	
United States Dollar	302,700	-	302,700	99.8

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$10,422,000 (September 30, 2020 – \$6,054,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Fund's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 35 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI All Country World Index	270,887	114,051
Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index)	(191,027)	(60,594)
Blended Benchmark	456,981	192,943

The Blended Benchmark is composed of 45% MSCI All Country World Index, 30% Bloomberg Global Aggregate Index, 15% S&P/TSX Composite Index and 10% Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index).

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	75,489	(38,667)	36,822	2.9

September 30, 2020

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	-	(35,941)	(35,941)	(2.9)

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$736,000 (September 30, 2020 - increased or decreased by approximately \$719,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 15 percent change in benchmarks (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index)	51,037	76,226
MSCI All Country World Index	29,190	40,463
Blended Benchmark	67,483	92,435

The Blended Benchmark is composed of 36% Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index), 30% MSCI All Country World Index, 24% Bloomberg Canada Aggregate Index and 10% S&P/TSX Composite Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
(\$'000)				
United States Dollar	19,994	(13,739)	6,255	1.5

September 30, 2020

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
(\$'000)				
United States Dollar	9	(12,317)	(12,308)	(2.9)

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$125,000 (September 30, 2020 - increased or decreased by approximately \$246,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 40 percent change in benchmarks (September 30, 2020 – 35 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

September 30, 2021	Fair Value of Portfolio's Investment (\$'000)	% of Underlying Fund's and ETF's Net Assets
AGF European Equity Fund	8,545	13.2
AGFiQ US Equity ETF	18,982	12.1
AGF American Growth Fund	42,211	11.7

iShares MSCI Japan ETF	9,632	0.1
iShares MSCI Emerging Markets ETF	2,091	0.0
iShares Core S&P 500 ETF	10,731	0.0

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI All Country World Index	75,721	63,310
S&P/TSX Composite Index	55,898	44,129

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	23,488	(4,426)	19,062	9.0

September 30, 2020

	Financial Instruments	Foreign Exchange Forward Contracts	Total**	Percentage of Net Assets (%)
United States Dollar	-	(3,584)	(3,584)	(1.8)

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$381,000 (September 30, 2020 - increased or decreased by approximately \$72,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 35 percent change in benchmarks (September 30, 2020 – 15 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)	
	September 30, 2021	September 30, 2020
MSCI All Country World Index	178,712	75,545
Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index)	(145,855)	(48,348)
Blended Benchmark	229,853	97,497

The Blended Benchmark is composed of 72% MSCI All Country World Index, 20% Bloomberg Global Aggregate Index and 8% S&P/TSX Composite Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

(\$'000)	Foreign			Percentage of Net Assets (%)
	Financial Instruments	Exchange Forward Contracts	Total**	
United States Dollar	53,946	(13,836)	40,110	6.0

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)
			Total**	Net Assets (%)	
United States Dollar	-	(12,658)	(12,658)	(2.0)	

** Includes both monetary and non-monetary instruments, as applicable

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$802,000 (September 30, 2020 - increased or decreased by approximately \$253,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

DISCUSSION OF FINANCIAL INSTRUMENT RISK MANAGEMENT (Note 4)

Other Price Risk

The Schedule of Investment Portfolio of the Portfolio classifies securities by asset type.

The impact on Net Assets of the Portfolio due to a 10 percent change in benchmarks (September 30, 2020 – 20 percent), using historical correlation between the return of the Mutual Fund Units as compared to the return of the Portfolio's benchmarks, as at September 30, 2021 and 2020, with all other variables held constant, is included in the following table. Regression analysis has been utilized to estimate the historical correlation. The analysis uses 36 monthly data points, unless the inception of the Portfolio is less than three years, in which case since inception data has been used. The returns of the other series of the Portfolio are substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

Benchmark	Impact on Net Assets (\$'000)
September 30, 2021	September 30, 2020
Bloomberg Global Aggregate Index (formerly, Bloomberg Barclays Global Aggregate Index)	(21,909) (14,445)
MSCI All Country World Index	60,183 117,103
Blended Benchmark	137,569 254,047

The Blended Benchmark is composed of 60% Bloomberg Global Aggregate Index, 15% Bloomberg Canada Aggregate Index (formerly, Bloomberg Barclays Canada Aggregate Index), 15% MSCI All Country World Index and 10% S&P/TSX Composite Index.

The historical correlation may not be representative of the future correlation, and accordingly the impact on Net Assets could be materially different.

NOTES TO FINANCIAL STATEMENTS — FUND SPECIFIC INFORMATION CONTINUED

Currency Risk

The amounts in the following tables are based on the fair value of the Portfolio's financial instruments (including cash and cash equivalents) as well as the underlying principal amounts of foreign exchange forward contracts, as applicable. Other financial assets (including dividends, distributions and interest receivables and receivables for investments sold) and financial liabilities (including payable for investments purchased) that are denominated in foreign currencies do not expose the Portfolio to significant currency risk.

Currencies to which the Portfolio had exposure as at September 30, 2021 and 2020 were as follows:

September 30, 2021

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)
		Total	**	
United States Dollar	68,440	(52,842)	15,598	1.0
Euro Currency	3	-	3	0.0

September 30, 2020

(\$'000)	Financial Instruments	Foreign Exchange Forward Contracts		Percentage of Net Assets (%)
		Total	**	
Euro Currency	3	-	3	0.0
United States Dollar	92	(58,496)	(58,404)	(3.8)

**** Includes both monetary and non-monetary instruments, as applicable**

As at September 30, 2021 and 2020, if the Canadian dollar had strengthened or weakened by 2 percent, in relation to all currencies, with all other variables held constant, Net Assets would have decreased or increased, respectively, by approximately \$312,000 (September 30, 2020 - increased or decreased by approximately \$1,168,000).

In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

The Portfolio is indirectly exposed to credit, interest rate and currency risks, as applicable of the underlying funds as at September 30, 2021 and 2020.

FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (Note 4)

The following tables illustrate the classifications of the Portfolio's financial instruments within the fair value hierarchy as at September 30, 2021 and 2020.

The address of the Funds' registered office is 31st Floor, 66 Wellington Street West, Toronto, Ontario.

The investment objectives for each fund are provided in the respective fund's Notes to Financial Statements – Fund Specific Information.

These financial statements were authorized for issue on November 24, 2021 by the Board of Directors of Tax Advantage Group for the Classes and by the Board of Directors of AGFI, as trustee, for the Trust Funds.

(d) Fund launches:

AGFiQ Global Balanced ETF Portfolio Fund and AGFiQ Global Income ETF Portfolio Fund were

established on September 17, 2020 with total seed capital investment of \$150,000 per fund and commenced operations on October 2, 2020 at an initial asset value of \$25.00 per Mutual Fund Unit and Series F Unit.

(e) Fund reorganizations:

During 2020, certain funds (listed under "Merging Fund" in the following table) merged with other funds with similar investment objectives (the "Continuing Fund"). Pursuant to each of the mergers, the Continuing Fund acquired all of the assets and

assumed all of the liabilities of the corresponding Merging Fund in exchange for shares/units in the Continuing Fund. Shareholders/Unitholders of the Merging Fund exchanged their shares/units for shares/units of the same series of the Continuing Fund based on an exchange ratio. The purchase method was used to account for these mergers and the Continuing Fund was identified as the acquiring fund for accounting purposes. The financial statements of each of the Continuing Funds include the results of operations of the corresponding Merging Fund from the date of the merger.

The effective date of the mergers, the exchange ratios, the total number of shares/units issued by the Continuing Fund and the Net Asset Value (as defined in Note 2) acquired are summarized as follows:

Merging Fund	Merger Date	Exchange Ratio*	Continuing Fund	Number of Shares/Units Issued	Net Asset Value Acquired (\$)

(f) Fiscal periods:

Except as indicated below, the financial statements of each of the Funds comprise the Statements of Financial Position as at September 30, 2021 and 2020, and the Statements of Comprehensive Income, Changes in Net Assets Attributable to Holders of Redeemable Shares/Units and Cash Flows for the years ended September 30, 2021 and 2020. The Schedule of Investment Portfolio is as at September 30, 2021.

The Statements of Comprehensive Income, Changes in Net Assets Attributable to Holders of Redeemable Units and Cash Flows of AGFiQ Global Balanced ETF Portfolio Fund and AGFiQ Global Income ETF Portfolio Fund are prepared for the year ended September 30, 2021 and the period from September 17, 2020 (date of establishment) to September 30, 2020.

(g) Name changes:

Certain funds were renamed effective April 30, 2021 (see tables in Notes 1(a) and (b)).

Effective April 22, 2020, AGF Equity Income Focus Fund was renamed AGF Equity Income Fund.

Effective May 29, 2020, AGF Global Strategic Balanced Fund was renamed AGF Global Growth Balanced Fund.

2. SUMMARY OF ACCOUNTING POLICIES:

Basis of presentation

These financial statements have been prepared in compliance with International Financial Reporting Standards ("IFRS"). The financial statements are prepared under the historical cost convention, except for financial assets and financial liabilities that have been measured at fair value.

Notes to Financial Statements

CONTINUED

SEPTEMBER 30, 2021

The financial statements of the Classes present financial information of each class as its own reporting entity. If Tax Advantage Group cannot satisfy its obligations related to one class, it may be required to satisfy them using assets attributable to other classes. The Manager believes that the risk of such cross-class liability is remote.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following summarizes the significant accounting policies of the Funds.

Financial instruments

Financial instruments include financial assets and liabilities, such as investments, derivatives, cash and cash equivalents, and other receivables and payables. The Funds classify and measure financial instruments in accordance with IFRS 9, *Financial Instruments*. Upon initial recognition, financial instruments are classified as fair value through profit or loss ("FVTPL"). All financial assets and liabilities are recognized in the Statements of Financial Position when the fund becomes a party to the contractual requirements of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and when the Funds have transferred substantially the risks and rewards of ownership of the assets. Financial liabilities are derecognized when the obligation specified in the contract is discharged, cancelled or expired. Realized gains and losses are recognized based on the average cost method and included in the Statements of Comprehensive Income in the period in which they occurred. As such, investment purchase and sale transactions are recorded as of the trade date.

Financial assets and financial liabilities are subsequently measured at FVTPL with changes in fair value recognized in the Statements of Comprehensive Income.

The accounting policies for measuring the fair value of investments and derivatives are substantially similar to those used in measuring the Funds' net asset value ("Net Asset Value") for the purpose of processing shareholder/unitholder transactions in accordance with Section 14.2 of National Instrument 81-106. For Tax Advantage Group, the Net Asset Value of a particular class of shares is determined with reference to the assets and liabilities attributable to such class pursuant to the investment objectives of that class. The Net Asset Value of a particular series of a class is computed by calculating the value of that series' proportionate share of the assets and liabilities attributable to that class less the liabilities attributable only to that series of the class. The assets attributable to any of the classes of Tax Advantage Group are available to satisfy all of the obligations of Tax Advantage Group. For the Trust Funds, the Net Asset Value of a particular series of units is computed by calculating the value of that series' proportionate share

of the assets and liabilities of the fund common to all series less the liabilities of the fund attributable only to that series. As at all dates presented, there were no differences between the Funds' Net Asset Value per share/unit and net assets attributable to holders of redeemable shares/units per share/unit.

Valuation of investments, derivatives and commodities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of investments, derivatives and commodities is determined as follows:

- (a) Investments, except for non-North American equities, that are traded in an active market through recognized public stock exchanges, over-the-counter markets, or through recognized investment dealers, are valued based on quoted market prices at the close of trading on the reporting date. The Funds use the last traded market price for both financial assets and financial liabilities where the last traded price falls within that day's closing bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances. Procedures are in place to fair value non-North American equities based on information provided by an independent pricing source to avoid stale prices and take into account, among other things, any significant events occurring after the close of a foreign market.
- (b) Investments that are not traded in an active market are valued using valuation techniques. The Funds use a variety of methods and make assumptions that are based on market conditions existing at each reporting date. Valuation techniques include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other techniques commonly used by market participants and which make the maximum use of observable inputs. The fair value of certain securities may be estimated using valuation techniques based on assumptions that are not supported by observable market inputs.
- (c) Foreign exchange forward contracts are valued based on the difference between the contractual forward rates and the mid forward rates for currency held long or sold short at the measurement date.
- (d) Options are valued at the closing price as reported by the principal exchange or over-the-counter market on which the contract is traded.
- (e) Credit default swaps are valued based on prices obtained directly from an independent price source or broker.

Notes to Financial Statements

CONTINUED

SEPTEMBER 30, 2021

- (f) Investments in the Underlying Funds are valued at the Net Asset Value per share/unit of the respective series as of the valuation date.
- (g) Gold and silver bullion are measured at fair value based on the quoted price provided by an independent pricing source.

Cash and cash equivalents

Cash and cash equivalents are comprised of deposits with financial institutions with an original maturity date of 90 days or less at the date of purchase. Cash and cash equivalents are reported at fair value which closely approximates their amortized cost due to their nature of being highly liquid and having short terms to maturity. Where cash and cash equivalents are in net bank overdraft positions, these are presented as current liabilities in the Statements of Financial Position.

Commissions and other portfolio transaction costs

Commissions and other portfolio transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of an investment, which include fees and commissions paid to agents, advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Such costs are expensed and are included in "Commissions and other portfolio transaction costs" in the Statements of Comprehensive Income.

Commissions and other portfolio transaction costs do not apply to the Fund on Fund Classes as their investments in Underlying Funds do not incur such costs.

Cost of investments

The cost of investments represents the amount paid for each security, and is determined on an average cost basis excluding commissions and other portfolio transaction costs, where applicable.

Investment transactions and income

Investment transactions are accounted for on the trade date. Realized gains and losses on sale of investments and unrealized appreciation and depreciation of investments are calculated on an average cost basis.

Interest for distribution purposes shown in the Statements of Comprehensive Income represents coupon interest on debt instruments accounted for on an accrual basis. Interest receivable is included in "Dividends and interest receivable" in the Statements of Financial Position based on the debt instruments' stated rates of interest. The Funds (except AGF Canadian Money Market Fund) do not amortize premiums paid or discounts received on the purchase of fixed income securities except for zero-coupon bonds, which are amortized on an effective yield basis. For AGF Canadian Money Market Fund, premiums paid or discounts received on all fixed income securities are amortized on a straight line basis.

Dividend income and distributions from exchange traded funds ("ETFs") are recognized on ex-dividend date and distributions from Underlying Funds are recognized on distribution date. Securities lending income is recognized on an accrual basis.

Written options

Written option premiums received by the Funds are, so long as the options are outstanding, reflected as a liability in the Statements of Financial Position and are valued at an amount equal to the current market value of an option that would have the effect of closing the position. Gains or losses realized upon expiration or exercise of the option are included in "Net realized gain (loss) on derivatives" in the Statements of Comprehensive Income.

Foreign exchange forward contracts

The Funds may enter into foreign exchange forward contracts for economic hedging purposes or to establish an exposure to a particular currency. Unrealized gains and losses on foreign exchange forward contracts are included in "Net change in unrealized appreciation (depreciation) in value of derivatives" in the Statements of Comprehensive Income. Upon closing of a contract, the gain or loss is included in "Net realized gain (loss) on derivatives". Outstanding settlement amounts on the close out of foreign exchange forward contracts are included in "Receivable for foreign exchange forward contracts" or "Payable for foreign exchange forward contracts" in the Statements of Financial Position.

Credit default swaps

Certain funds may enter into credit default swap agreements, which are designed to mitigate credit risk exposure to issuing entities or the entire portfolio through a credit index (the "referenced asset") held by a fund or to increase credit risk exposure to the referenced asset by creating a notional investment position for the fund. Where a notional investment position is created, the credit risk exposure of a fund is comparable to the exposure that would have resulted if the fund were invested directly in the referenced asset.

Under a credit default swap agreement, the protection buyer, whose intention is to reduce its credit risk exposure to the referenced asset, pays or receives an upfront payment and pays a premium to the protection seller, who assumes the credit risk of the referenced asset. The upfront payment is paid or received at the beginning of the swap arrangement and the premium is paid at regular intervals (usually quarterly) over the term of the swap agreement. In return for the premium paid, the protection buyer is entitled to receive from the protection seller full payment for a loss arising from a credit default event of the referenced asset. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. A credit default event

Notes to Financial Statements

CONTINUED

SEPTEMBER 30, 2021

may be triggered by bankruptcy, failure to pay or restructuring of the issuer of the referenced asset. If a credit default event occurs, the swap may be settled by either the physical delivery of the referenced asset for proceeds equal to par value or a cash payment equal to the loss amount. If there is no credit default event, no contingent amount is payable.

As a protection seller, losses may arise due to a credit default event. As a protection buyer, losses may arise if the counterparty does not perform under the arrangement. For both the protection buyer and protection seller, such loss is limited to the notional amount of the credit default swap less any applicable recoverable amount, calculated by the product of the notional amount and the recovery rate of the respective referenced asset.

Credit default swaps are included in the Schedule of Investment Portfolio, as applicable, and are valued at fair value on each valuation date. The upfront payment is also included in the fair value. Quarterly premiums paid or received, if any, are accrued daily and included in "Derivative income (loss)" in the Statements of Comprehensive Income. When credit default swaps expire or are closed out, gains or losses are included in "Net realized gain (loss) on derivatives" in the Statements of Comprehensive Income. The change in fair value of credit default swaps is included in "Net change in unrealized appreciation (depreciation) in value of derivatives" in the Statements of Comprehensive Income.

If applicable, any cash deposits or borrowings on margin relating to the trading of credit default swaps are included in "Margin deposit on derivatives" in the Statements of Financial Position.

As applicable, the credit default swaps held by the Funds are centrally cleared; thus, the related credit risk is somewhat reduced as a margin balance is maintained and a variation margin is regularly settled with the clearing counterparty.

Investments in associates and subsidiaries

The Funds have determined that they meet the definition of "investment entities". An investment entity is an entity that (i) obtains funds from one or more investors for the purpose of providing them with investment management services; (ii) commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both; and (iii) measures and evaluates the performance of substantially all of its investments on a fair value basis. The most significant judgment that the Funds have made in determining that they meet this definition is that fair value is used as the primary measurement attribute to measure and evaluate the performance of substantially all of their investments.

Subsidiaries are entities over which the Funds have control through their exposure or rights to variable

returns and have the ability to affect those returns through their power over the entities. As the Funds meet the definition of an investment entity, subsidiaries, if any, are measured at FVTPL. The Funds' investments may also include associates over which the Funds have significant influence and these are also measured at FVTPL.

Interest in unconsolidated structured entities

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. The Funds have determined that holdings in Underlying Funds, ETFs, limited partnerships, mortgage-related and other asset-backed securities meet the definition of structured entities and as a result, such investments are accounted for at FVTPL. The Underlying Funds and ETFs are concluded to be structured entities as (i) the voting rights in these entities are not dominant factors in deciding who controls them; (ii) their activities are restricted by the prospectus; and (iii) the entities have narrow and well-defined objectives to provide investment opportunities for investors while passing on the associated risks and rewards.

The Funds may invest in Underlying Funds and ETFs to help achieve their respective investment objectives. Certain ETFs may employ leverage in a manner consistent with their respective investment objectives or as permitted by Canadian securities regulatory authorities. The Underlying Funds and ETFs finance their operations by issuing redeemable shares/units, which are puttable at the holder's option and entitles the holder to a proportionate stake in the respective net assets. A fund has the right to request redemption of its investments in Underlying Funds and ETFs on each valuation date. Additional information on the Funds' interest in Underlying Funds and ETFs, as applicable, is provided in the respective fund's Notes to Financial Statements – Fund Specific Information.

Certain funds may invest in mortgage-related and other asset-backed securities. These securities include commercial mortgage-backed securities, asset-backed securities, collateralized debt obligations and other securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property. Mortgage-related securities are created from pools of residential or commercial mortgage loans while asset-backed securities are created from many types of assets, including auto loans, credit card receivables, home equity loans and student loans.

The Funds' holdings in Underlying Funds, ETFs, limited partnerships, mortgage-related and other asset-backed securities, as applicable, are included in the Schedule of

Notes to Financial Statements

Investment Portfolio and represent the Funds' maximum exposure to these investments. The change in fair value of these investments is included in "Net change in unrealized appreciation (depreciation) in value of investments" in the Statements of Comprehensive Income.

Offsetting of financial assets and liabilities

Financial assets and liabilities are offset and the net amount is reported in the Statements of Financial Position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. In the normal course of business, the Funds enter into various master netting arrangements or other similar agreements that do not meet the criteria for offsetting in the Statements of Financial Position, but still allow for the related amounts to be set off in certain circumstances, such as bankruptcy or termination of the contracts.

Securities lending transactions are subject to master netting arrangements as discussed below (refer to Securities lending transactions). Information on other financial assets and liabilities that are subject to master netting or similar arrangements, as applicable, is disclosed in the respective fund's Notes to Financial Statements – Fund Specific Information.

Impairment of financial assets

At each reporting date, the Funds assess whether there is objective evidence that a financial asset at amortized cost is impaired. If such evidence exists, the Funds recognize an impairment loss as the difference between the amortized cost of the financial asset and the present value of the estimated future cash flows, discounted using the instrument's original effective interest rate. Impairment losses on financial assets at amortized cost are reversed in subsequent periods if the amount of the loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized.

Redeemable shares/units

The Trust Funds' outstanding redeemable units' entitlements include a contractual obligation to distribute any net income and net realized capital gains annually in cash (at the request of the unitholder) and therefore the ongoing redemption feature is not the units' only contractual obligation. Consequently, the Trust Funds' outstanding redeemable units are classified as financial liabilities in accordance with the requirements of IAS 32, *Financial Instruments: Presentation*.

The Classes offer shares of multiple series, with each series being equally subordinate and having non-identical attributes. Accordingly, the shares of the Classes are classified as financial liabilities in accordance with IAS 32.

The Funds' obligations for net assets attributable to holders of redeemable shares/units are measured at redemption amounts.

Foreign currency translation

The financial statements are expressed in Canadian dollars, which is the Funds' functional and presentation currency. Foreign currency transactions and balances are translated into the functional currency as follows:

- (a) Assets, including fair value of investments, and liabilities denominated in foreign currencies are converted into Canadian dollars at the exchange rates prevailing at the valuation date.
- (b) Purchases and sales of investments, dividends and interest income denominated in foreign currencies are converted into Canadian dollars at the exchange rates prevailing on the respective dates of such transactions.
- (c) Foreign exchange gains and losses on investments are included in "Net realized gain (loss) on investments" and "Net change in unrealized appreciation (depreciation) in value of investments" in the Statements of Comprehensive Income.
- (d) Foreign exchange gains and losses on other financial assets (other than investments) and liabilities denominated in foreign currencies are included in "Net gain (loss) on foreign currencies and other net assets" in the Statements of Comprehensive Income.

Allocation of income and expenses

For Tax Advantage Group, expenses directly attributable to a class are charged directly to that class and expenses directly attributable to a series of the class are charged directly to that series. Income, realized and unrealized gains and losses from investment transactions are allocated proportionately to each series based upon the relative Net Asset Value of each series. Other expenses are allocated proportionately to each class or series based upon the relative Net Asset Value of each class or series.

For the Trust Funds, expenses directly attributable to a series are charged directly to that series. Income, realized and unrealized gains and losses from investment transactions and other expenses are allocated proportionately to each series based upon the relative Net Asset Value of each series.

Increase (decrease) in net assets attributable to holders of redeemable shares/units from operations per share/unit

Increase (decrease) in net assets attributable to holders of redeemable shares/units from operations per share/unit is based on the increase (decrease) in net assets attributable to holders of redeemable shares/units from operations (excluding management fee distributions) divided by the weighted average number of

Notes to Financial Statements

CONTINUED

SEPTEMBER 30, 2021

shares/units outstanding during the period. The Funds' weighted average number of shares/units outstanding during the periods ended September 30, 2021 and 2020 is disclosed in Note 6.

Securities lending transactions

Certain funds entered into securities lending arrangements. These transactions involve the temporary exchange of securities for collateral with a commitment to deliver the same securities on demand. Income is earned from these transactions in the form of fees paid by the counterparty ("lending fees") and, in certain circumstances, interest paid on cash or securities held as collateral ("lending interest income"). Income earned from these transactions is included in "Securities lending income" in the Statements of Comprehensive Income. A reconciliation of the gross amount generated from securities lending transactions to the amounts of lending fees and lending interest income earned by each fund for the periods ended September 30, 2021 and 2020 is disclosed in the respective fund's Notes to Financial Statements – Fund Specific Information.

The aggregate market value of all securities loaned by a fund is not permitted to exceed 50% of the Net Asset Value of that fund. The minimum allowable collateral is 102% of the current value of the loaned securities as per the requirements of National Instrument 81-102. Collateral received is composed of cash (Canadian and U.S. Dollar) as well as debt obligations of the Government of Canada and other countries, Canadian provincial governments and financial institutions, and is not included in the Schedule of Investment Portfolio. Cash collateral is included in "Cash collateral received for securities on loan" and "Payable for cash collateral under securities lending" in the Statements of Financial Position.

The market value of the loaned securities is determined on the close of any valuation date, and any additional required collateral is delivered to the funds on the next business day. The securities on loan continue to be included in the Schedule of Investment Portfolio, and are included in "Investments at fair value through profit or loss" in the Statements of Financial Position. All the counterparties have an approved credit rating equivalent to a Standard & Poor's credit rating of not less than A-1 (low) on their short-term debt or A on their long-term debt.

Securities lending transactions are subject to enforceable master netting arrangements that allow for related amounts to be set-off when certain conditions arise. Under such circumstances, the Funds have the right to retain and dispose of the collateral to the extent necessary to satisfy their claims. The related amounts, as applicable, are disclosed in the respective fund's Notes to Financial Statements – Fund Specific Information and are not offset in the Statements of Financial Position.

The net of fair value of securities on loan and fair value of cash collateral received represents the impact on the respective fund if the set-off right was exercised.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS:

The preparation of financial statements requires management to use judgment in applying its accounting policies and to make estimates and assumptions that may affect the reported amounts of assets, liabilities, income and expenses as at and during the period. Actual results could differ from these estimates. The following discusses the most significant accounting judgments and estimates that the Funds have made in preparing the financial statements:

Fair value measurement of derivatives and securities not quoted in an active market

The Funds may hold financial instruments that are not quoted in active markets, including derivatives. Fair values of such instruments are determined using valuation techniques and may be determined using reputable pricing sources or indicative prices from market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. Where no market data is available, the Manager may value the Funds' positions using its own models, which are usually based on valuation methods and techniques generally recognized as standard within the industry. The models used to determine fair values are validated and periodically reviewed by experienced personnel of the Manager. Private equity securities are valued primarily based on valuation techniques as discussed in Note 2. These models use observable data, to the extent practicable. However, due to inherent uncertainty of valuations of such investments, the fair values may differ from the values that would have been used should an active market existed.

Classification of financial instruments

In classifying financial instruments held by the Funds, the Manager is required to make significant judgments in determining the most appropriate classification in accordance with IFRS 9. The Manager has assessed the Funds' business models, the manner in which all financial assets and financial liabilities are managed and performance evaluated as a group on a fair value basis, and concluded that FVTPL in accordance with IFRS 9 provides the most appropriate classification of the Funds' financial instruments.

Investment entity

In determining whether the Funds are investment entities, the Manager may be required to make significant judgments on whether the Funds meet the criteria and typical characteristics within IFRS 10, *Consolidated Financial Statements*. Certain funds may hold only one investment, have only one investor, or have

Notes to Financial Statements

CONTINUED

SEPTEMBER 30, 2021

investors that are related parties; however, the Funds meet the investment entity definition as discussed in Note 2 (refer to Investments in associates and subsidiaries).

4. FINANCIAL INSTRUMENTS:

Fair value measurement

The fair value hierarchy framework provides information to financial statement users about the relative observability of inputs to fair value measurements. The hierarchy has the following levels:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices), including the application of fair value factors derived from observable data to non-North American quoted equity prices in order to estimate the impact of differences in market closing times. The estimated fair values for these securities may be different from the values that would have been used had a ready market for the investment existed.
- Level 3 – Inputs that are not based on observable market data (unobservable inputs).

The classification within the hierarchy is based on the lowest level input that is significant to the fair value measurement. Refer to Notes to Financial Statements – Fund Specific Information of each fund for the fair value measurement disclosure.

All fair value measurements are recurring. Fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, the instrument is reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. The Funds' policy is to recognize transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

The Manager is responsible for performing the fair value measurements included in the financial statements of the Funds, including Level 3 measurements. At each reporting date, the Manager reviews and approves all Level 3 fair value measurements. The Manager also has a Valuation Committee which performs detailed reviews of the valuations of investments held by the Funds.

Management of financial instrument risks

In the normal course of business, each fund may be exposed to a variety of financial risks: credit risk, liquidity risk, market risk (including interest rate risk, other price

risk and currency risk) and concentration risk. The fair value of investments within a fund's portfolio can fluctuate on a daily basis as a result of changes in interest rates, economic conditions, market and company news related to specific securities within the fund. Market prices may be impacted by financial markets and political conditions, war and occupation, terrorism and related geopolitical risks, natural disasters, and public health emergencies, including an epidemic or pandemic. The level of risk depends on the fund's investment objectives and the type of securities it invests in.

Each fund's exposure to financial risks, as applicable, is disclosed in the respective fund's Notes to Financial Statements – Fund Specific Information.

AGFI maintains a risk management practice that includes quarterly monitoring of the returns based on the risk profile of the Funds. AGFI also monitors compliance with investment restrictions to ensure that such funds are being managed in accordance with their stated investment objectives, strategies and securities regulations.

For fixed income funds, on a quarterly basis, the fixed income team at AGFI also performs a formal review of the funds, which includes, but is not limited to, an assessment of the global macro environment, the outlook for credit and currencies, and the amount of active risk being taken in the respective funds.

Some funds specialize in a particular industry, or in a single country or geographic region of the world. These funds may therefore be more volatile than more broadly diversified funds. The overall risk management program of such funds seeks to minimize the potentially adverse effect of risk on each fund's financial performance in a manner consistent with its investment objective.

The portfolio managers of the Fund on Fund Trusts, Portfolio Classes and Portfolio Trusts consult with the asset allocation committee at AGFI to determine optimal asset allocations. Through analysis and assessment of the economic environment and capital markets, short-term (tactical) and long-term (strategic) views are established on asset classes, investment styles and geographic positioning for each portfolio.

Credit risk

Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with a fund.

Where a fund invests in debt instruments and derivatives or participates in securities lending, this represents the main concentration of credit risk. The fair value of debt instruments and derivatives includes consideration of the creditworthiness of the issuer and/or counterparty, and in the case of securities lending, creditworthiness of the borrower. This represents the maximum credit risk exposure of the fund. The credit risk related to the

Notes to Financial Statements

CONTINUED

SEPTEMBER 30, 2021

securities lending program is limited as each fund holds collateral of at least 102% of the fair value of the loaned securities. The collateral and loaned securities are marked to market on each valuation date and each fund lends no more than 50% of its Net Asset Value.

Certain funds invest in ETFs and may be exposed to indirect credit risk in the event that the ETFs invest in debt instruments and derivatives. Certain funds invest in Underlying Funds and may be exposed to indirect credit risk in the event that the Underlying Fund(s) invests in debt instruments, derivatives, enters into securities lending transactions or invests in ETFs that invest in debt instruments.

Each fund is also exposed to counterparty credit risk on cash and cash equivalents, amounts due from brokers and other receivable balances. All transactions executed by a fund in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

References made to credit ratings are obtained from Standard & Poor's and/or Dominion Bond Rating Service. Where one or more rating is obtained for a security, the lowest rating has been used.

Liquidity risk

Liquidity risk is defined as the risk that a fund may not be able to settle or meet its obligation on time or at a reasonable price.

Each fund is exposed to daily cash redemptions of redeemable shares/units. The shares/units of each fund (including Underlying Funds) are issued and redeemed on demand at the then current Net Asset Value per share/unit at the option of the shareholder/unitholder. Liquidity risk is managed by investing the majority of each fund's assets in investments that are traded in an active market and can be readily disposed. In accordance with securities regulations, each fund must invest at least 90% of assets in liquid investments at the time of purchase (i.e. investments that are traded in an active market and can be readily disposed of). In addition, each fund aims to retain sufficient cash and cash equivalent positions to maintain liquidity, and has the ability to borrow up to 5% of its Net Asset Value for the purpose of funding redemptions.

Each fund (except for the Fund on Fund Classes, Fund on Fund Trusts, Portfolio Classes and Portfolio Trusts) may, from time to time, invest in securities that are not traded in an active market and may be illiquid. Such investments include those that are identified as private and/or restricted securities in the applicable Schedule of Investment Portfolio. Certain funds may also employ the

use of derivatives to moderate certain risk exposures. There is no guarantee that a market will exist for some derivatives and it is possible that the exchanges may impose limits on trading of derivatives.

Certain funds invest in Underlying Funds and may be exposed to indirect liquidity risk in the event that the Underlying Fund(s) suspends redemptions resulting in the funds being unable to redeem their investments.

As at September 30, 2021 and 2020, the Funds' redeemable shares/units are redeemable on demand at the option of the shareholder/unitholder. All other financial liabilities of the Funds mature in one year or less.

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or fair values of financial instruments.

Interest rate risk arises when a fund invests in interest-bearing financial instruments. The fund is exposed to the risk that the value of such financial instruments will fluctuate due to changes in the prevailing levels of market interest rates. There is minimal fair value sensitivity to interest rate fluctuations on any cash and cash equivalents invested at short-term market interest rates.

The majority of financial assets and liabilities of the Fund on Fund Classes, Fund on Fund Trusts, Portfolio Classes and Portfolio Trusts are non-interest bearing; accordingly, they are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. Certain funds invest in Underlying Funds and may be exposed to indirect interest rate risk in the event that the Underlying Fund(s) invests in interest-bearing financial instruments. Certain funds invest in ETFs and may be exposed to indirect interest rate risk in the event that the ETFs invest in interest-bearing financial instruments.

Within a money market fund, there is minimal fair value sensitivity to changes in interest rates since securities are usually held to maturity and tend to be short-term in nature.

Other price risk

Other price risk is the risk that the fair value or future cash flows of financial instruments and commodities will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk). The methodology used to calculate the sensitivity impact on net assets attributable to holders of redeemable shares/units may result in a figure that exceeds the net assets attributable to holders of redeemable shares/units of the fund; however, the maximum loss that can be sustained by the holders of redeemable shares/units of the fund in aggregate may

Notes to Financial Statements

CONTINUED

SEPTEMBER 30, 2021

not exceed the net assets attributable to holders of redeemable shares/units.

The portfolio manager of each fund (except the Fund on Fund Trusts, Portfolio Classes and Portfolio Trusts) aims to moderate this risk through a careful selection and diversification of securities and other financial instruments within the limits of the fund's investment objectives and strategy. The maximum risk resulting from financial instruments and commodities is determined by their fair value. Each fund's overall market position is monitored on a daily basis by the portfolio manager. Financial instruments and commodities, if applicable, held by each fund are susceptible to market price risk arising from uncertainties about future prices of the instruments.

For the Fund on Fund Trusts, Portfolio Classes and Portfolio Trusts, AGFI aims to moderate the other price risk through a careful selection and diversification of the Underlying Funds and ETFs within the limits of the funds' investment objectives and strategy. The level of risk and holdings within the Fund on Fund Trusts, Portfolio Classes and Portfolio Trusts are reviewed and rebalanced on a quarterly basis, or as deemed appropriate.

Currency risk

Currency risk is the risk that the value of financial instruments and commodities will fluctuate due to changes in foreign exchange rates.

Currency risk arises from financial instruments (including cash and cash equivalents) and commodities, if applicable, that are denominated in a currency other than Canadian dollars, which represents the functional currency of the Funds. Each fund may enter into foreign exchange forward contracts for hedging purposes to reduce its foreign currency exposure, or to establish exposure to foreign currencies.

Certain funds invest in ETFs and may be exposed to indirect currency risk in the event that the ETFs invest in financial instruments and commodities that are denominated in a currency other than Canadian dollars. The direct exposure to currency risk for the Fund on Fund Classes, Fund on Fund Trusts, Portfolio Classes and Portfolio Trusts is minimal as the shares/units of the Underlying Fund(s) and/or ETFs held are primarily valued in Canadian dollars. Each Fund on Fund Class, Fund on Fund Trust, Portfolio Class and Portfolio Trust may be exposed to indirect currency risk in the event that the Underlying Fund(s) and/or ETFs invests in financial instruments that are denominated in a currency other than Canadian dollars.

Concentration risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, asset type, industry sector or counterparty exposure. The disclosure of concentration

risk is provided in the Notes to Financial Statements – Fund Specific Information of each fund.

LIBOR transition risk

LIBOR transition risk is the risk related to the anticipated discontinuation of the LIBOR by the end of 2021. Certain instruments held by the Funds rely in some fashion upon LIBOR. Although the transition process away from LIBOR has become increasingly well-defined in advance of the anticipated discontinuation date, there remains uncertainty regarding the nature of any replacement rate and any potential effects of the transition away from LIBOR on the Funds or on certain instruments in which the Funds invest can be difficult to ascertain. The transition process may involve, among other things, increased volatility or illiquidity in markets for instruments that currently rely on LIBOR and may result in a reduction in value of certain instruments held by the Funds.

5. TAXATION:

(a) Tax Advantage Group is a single corporation for tax purposes and computes its net income (loss) for tax purposes as such. The taxation year end of the corporation is September 30 of each calendar year. Tax Advantage Group qualifies as a mutual fund corporation under the Income Tax Act (Canada) (the "Tax Act"). The general income tax rules associated with a public corporation also apply to a mutual fund corporation with the exception that income taxes payable on realized capital gains are refundable on a formula basis when shares are redeemed or capital gains dividends are paid.

All of the corporation's expenses, including expenses common to all series of the corporation and management and advisory fees and other expenses specific to a class of the corporation, will be taken into account in determining the income or loss of the corporation as a whole and applicable taxes payable by the corporation as a whole. Similarly, all of Tax Advantage Group's income, deductible expenses, capital gains and capital losses in connection with Tax Advantage Group's investment portfolio and other items relevant to the tax position of Tax Advantage Group (including the tax attributes of all of Tax Advantage Group's assets) will be taken into account in determining the income or loss of Tax Advantage Group and applicable taxes payable by Tax Advantage Group as a whole including refundable capital gains taxes.

Interest and foreign income are taxed at normal corporate rates applicable to mutual fund corporations and can be reduced by permitted deductions for tax purposes such as expenses and loss carryforwards.

Tax Advantage Group is subject to Part IV federal tax of 38 1/3% on the amount of taxable dividends

Notes to Financial Statements

received from taxable Canadian corporations. This tax is refundable as the corporation pays taxable dividends to its shareholders at the rate of \$1 for every \$2.60 of taxable dividends paid. Tax Advantage Group is also subject to Part I tax on other income and net taxable capital gains for the year. Part I tax on taxable capital gains can be reduced by the capital gains refund available to a mutual fund corporation which is calculated based on the level of redemptions by shareholders and capital gains dividends distributed to shareholders.

As a result of the capital gains refund mechanism and Part IV tax refunds, Tax Advantage Group recovers any Canadian income taxes paid in respect of its capital gains and taxable dividends received from taxable Canadian corporations. For the taxation year ended September 30, 2021, Tax Advantage Group had sufficient expenses to offset other income such that the corporation would not be subject to Part I tax on other income. Accordingly, Tax Advantage Group did not record any provision for such income taxes.

As a result, Tax Advantage Group has determined that it is in substance not taxable. Consequently, the tax benefit of capital and non-capital losses and other temporary differences have not been reflected in the Statements of Financial Position as deferred income tax assets or liabilities.

For the taxation year ended September 30, 2021, Tax Advantage Group did not qualify as an investment corporation for tax purposes and was therefore subject to refundable Part IV tax on dividends received from certain Canadian corporations. Tax Advantage Group did not pay any ordinary dividends for the period.

As of the most recent taxation year end of September 30, 2021, Tax Advantage Group had available capital and non-capital losses as follows:

(thousands of dollars)	Non-Capital Loss* Year of Expiry	Capital Loss** (\$)
Tax Advantage Group	2036	179,719 26,458

* Non-capital losses can be offset against income in future years.

** Net capital losses can be carried forward indefinitely for offset against capital gains in future years.

Series FV, Series T and Series V Shares of the Classes may make monthly distributions of capital so long as there is sufficient capital attributable to those series.

(b) The Trust Funds (except AGF European Equity Fund, AGFiQ Global Balanced ETF Portfolio Fund and AGFiQ Global Income ETF Portfolio Fund) qualify as

mutual fund trusts under the Tax Act. In accordance with the terms of the Declaration of Trust, all of the net income for tax purposes and sufficient net realized capital gains, determined in Canadian dollars, will be paid or payable to unitholders in the taxation year so that no income tax is payable by the funds (after taking into account applicable capital gains tax refunds and prior year unutilized losses). AGF European Equity Fund, AGFiQ Global Balanced ETF Portfolio Fund and AGFiQ Global Income ETF Portfolio Fund qualify as unit trusts under the Tax Act. AGF Canadian Money Market Fund, AGF European Equity Fund, AGFiQ Global Balanced ETF Portfolio Fund and AGFiQ Global Income ETF Portfolio Fund have their taxation years end on December 31 of each calendar year. All other Trust Funds elected to have their taxation years end on December 15 of each calendar year.

(c) Each of AGF European Equity Fund, AGFiQ Global Balanced ETF Portfolio Fund and AGFiQ Global Income ETF Portfolio Fund intends to distribute in each year sufficient net income and net realized capital gains, if any, to ensure that the fund is not liable for income tax under Part I of the Tax Act, other than alternative minimum tax, after taking into account any loss carry forwards and other deductions or credits available to the fund under the Tax Act. All or any portion of AGF European Equity Fund's net capital gains will be allocated in respect of units of the fund which have been redeemed at any time in that year, provided that the amount of net capital gains allocated in respect of such redeemed units shall not exceed the amount, if any, by which the amount payable on the redemption of such units exceeds the adjusted cost base to the unitholder of the units redeemed. Any remaining net capital gains will be distributed to the unitholders at the end of the taxation year.

All or substantially all of the Trust Funds' net income for tax purposes and sufficient net capital gains realized in any period are required to be distributed to unitholders such that no income tax is payable by the Trust Funds. As a result, the Trust Funds have determined that they are in substance not taxable and therefore do not record income taxes in the Statements of Comprehensive Income. Consequently, the tax benefit of capital and non-capital losses and other temporary differences have not been reflected in the Statements of Financial Position as deferred income tax assets or liabilities.

(d) In addition to the determination and payment of distributions as stated above, AGFI at its discretion may waive or reduce the effective management fee payable by certain unitholders, including unitholders affected by the restructuring of the former Series A and C Units of certain funds in 1997 or any applicable

Notes to Financial Statements

fund mergers. The decision to waive or reduce depends on a number of factors, including the size or the nature of the investment. AGFI reduces the management fee it charges to the particular fund and directs the fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The Portfolio Trusts (except AGF Elements Yield Portfolio) may also make distributions under the Elements Advantage Program (the "Elements Program").

Under the Elements Program, holders of Mutual Fund Units, Series D Units and Series F Units of the Portfolio Trusts (except AGF Elements Yield Portfolio) may be entitled to receive distributions in an amount equal to management fee reductions by AGFI. AGFI will determine at the end of each three year period (commencing on the date of first acquisition of a unit by an investor), in respect of such unit purchased by an investor, the amount of such management fee reductions. AGFI will reduce its management fees if the average weighted annualized rate of return is less than the benchmark return, in respect of the value of such units at the end of the three year period. Such management fee reductions in respect of units held throughout each three year period, shall equal the lesser of: (i) 90 basis points; and (ii) the shortfall between the average weighted annualized rate of return and the benchmark return. Distributions made pursuant to the Elements Program are considered management fee distributions.

With respect to the Elements Program, any new units of the applicable Portfolio Trusts purchased subsequent to June 19, 2009 were no longer eligible. Units purchased in eligible portfolios prior to a trade date of June 22, 2009 would be eligible for any subsequent three year periods so long as the relevant units are not redeemed before the end of each three year period, until AGFI terminated the Elements Program effective September 23, 2019. Unitholders of eligible units are entitled to receive their final payout, if any, payable upon expiry of the three year period following the termination date and shall receive no further right to participate in the program thereafter.

Management fee distributions will first be made out of net income and net taxable capital gains. Amounts paid in excess of net income and capital gains will constitute a return of capital.

For financial statement reporting purposes, management fee distributions are accounted for as distributions.

- (e) As of the Trust Funds' most recent taxation year end of December 15 and December 31, 2020, as applicable, the following funds had available capital and non-capital losses as follows:

(g) AGF Emerging Markets Fund, as Foreign Portfolio Investors in India, is subject to local tax (ranging from 15.60% to 17.94% depending on level of annual income earned) on capital gains realized on the sale of securities listed on a recognized stock exchange in India that are held for less than one year. Capital gains realized on the sale of securities listed on a recognized stock exchange in India that are held for longer than one year are subject to local tax at lower rates (ranging from 10.40% to 11.96% depending on level of annual income earned). Accordingly, AGF Emerging Markets Fund accrues for such local taxes on the net unrealized gain on such Indian securities with the amount reflected in "Foreign taxes payable" in the Statements of Financial Position and "Foreign withholding taxes" in the Statements of Comprehensive Income.

6. REDEEMABLE SHARES/UNITS:

Shares/units issued and outstanding represent the capital of each fund. The authorized capital of Tax Advantage Group consists of one hundred classes of shares, issuable in series and in unlimited numbers. As at September 30, 2021 and 2020, 19 classes of shares have been created and authorized for issue (refer to Note 1(a)). Each of the Trust Funds is authorized to issue an unlimited number of units of multiple series that rank equally. The various series that may be offered by the Funds are as described below.

Classic Series:	Available to all investors of AGFiQ North American Dividend Income Fund.
Mutual Fund Series:	Available to all investors.
Series F:	Available to investors who are participants in a fee-for-service or wrap account program sponsored by certain registered dealers or are investing via certain discount brokers.
Series FV:	Available to investors who are participants in a fee-for-service or wrap account program sponsored by certain registered dealers (or are investing via certain discount brokers), and are seeking regular monthly distributions at a similar or higher rate than the distributions to the other series of the same fund, with the exception of Series T.
Series I:	Available to institutional investors, including funds, who meet the criteria established by AGFI. Management fees in respect of this series are negotiated in a subscription agreement with AGFI and paid directly by the investors.
Series O:	Available to institutional investors, including funds, who meet the criteria established by AGFI. Management fees in respect of this series are negotiated in a subscription agreement with AGFI and paid directly by the investors.

Series Q:	Available to a Household* that meets the minimum investment requirements of Series Q. Management fees and service fees in respect of this series are paid directly by the investors to AGFI and registered dealers, respectively.
Series S:	Available to institutional investors, including certain funds, who meet the criteria established by AGFI. Series S securities may not be purchased by individuals.
Series T:	Available to investors seeking regular monthly distributions at a higher rate than the distributions to the other series of the same fund.
Series V:	Available to investors seeking regular monthly distributions at a higher rate than the distributions to the other series of the same fund, with the exception of Series T.
Series W:	Available to a Household* that meets the minimum investment requirements of Series W. Series W securities are designed for investors who are participants in a fee-for-service or wrap account program sponsored by certain registered dealers (or are investing via certain discount brokers). Management fees in respect of this series are paid directly by the investors.

* Generally, a Household (which may consist of a single investor) will qualify and continue to qualify for Series Q and Series W if it meets one of the following minimum investment requirements: (i) maintain the higher of a book value or market value of at least \$100,000 in each fund; or (ii) maintain the higher of an aggregate book value or market value of at least \$250,000 in all funds. Refer to the Funds' prospectus for more information on Household requirements.

Shares/Units of the Funds are issued and redeemed at the then current Net Asset Value per share/unit at the option of the shareholder/unitholder. Shareholders/unitholders on record date are entitled to dividends or distributions. Dividends on shares or distributions of income/capital of Tax Advantage Group are paid in cash or, at the option of the shareholder, may be used to purchase additional shares of its own class. Distributions on units of a Trust Fund are reinvested in additional units of its own fund or, at the option of the unitholders, paid in cash. The characterization of the distributions for a Trust Fund is based on management's estimate of the actual income for the year. The Funds have no restrictions or specific capital requirements on the subscription and redemption of shares/units, other than minimum subscription requirements. The Statements of Changes in Net Assets Attributable to Holders of Redeemable Shares/Units identify changes in each fund's capital during the periods. AGFI manages the capital of the Funds in accordance with the Funds' investment objectives, including managing their liquidity in order to be able to meet redemptions as discussed in Note 4.

- In April 2021, AGF China Focus Class, AGF Emerging Markets Class, AGF European Equity Class and AGF Global Sustainable Balanced Fund recommended the offering of Series O Shares/Units. Series O

Shares/Units previously commenced offering in August 2004, January 2011, June 2003 and August 2011, respectively, and was subsequently closed due to full redemption by shareholders/unitholders in December 2015, April 2012, February 2013 and February 2012, respectively.

- In October 2020, AGFiQ U.S. Sector Class, AGF Canadian Small Cap Fund, AGF Global Convertible Bond Fund and AGF Global Real Assets Fund commenced the offering of Series O Shares/Units. AGF Global Corporate Bond Fund and AGF U.S. Small-Mid Cap Fund recommenced the offering of Series O Units. Series O Units previously commenced

offering in June 2006 and November 2004, respectively, and was subsequently closed due to full redemption by unitholders in June 2013 and November 2006, respectively.

- In June 2020, AGF Global Select Fund commenced the offering of Series I Units.
- In November 2019, AGF Global Sustainable Growth Equity Fund recommenced the offering of Series O Units. Series O Units previously commenced offering in October 2015 and was subsequently closed due to full redemption by unitholders in April 2016.

itself or hires an external investment manager to manage the investment portfolio of each of the Funds.

AGF International Advisors Company Limited, a wholly-owned subsidiary of AGF Management Limited ("AGF"), provides investment advisory services to AGF European Equity Class and AGF European Equity Fund.

Prior to October 26, 2020, AGF Asset Management Asia Ltd., a wholly-owned subsidiary of AGF prior to its wind-up effective July 12, 2021, provided investment advisory services to AGF China Focus Class.

AGFI entered into an investment management agreement with Cypress Capital Management Ltd. ("Cypress"), an indirect wholly-owned subsidiary of AGF, pursuant to which Cypress is responsible for managing the investment portfolio of AGF Canadian Small Cap Fund.

Prior to January 1, 2020, AGFI also entered into an investment management agreement with Highstreet Asset Management Inc. ("Highstreet"), an indirect wholly-owned subsidiary of AGF, pursuant to which Highstreet was responsible for managing the investment portfolio of AGFiQ Canadian Dividend Income Fund. Highstreet was also one of the portfolio managers of AGFiQ North American Dividend Income Class and AGFiQ North American Dividend Income Fund. In addition, Highstreet provided investment advisory services to AGF Global Real Assets Class, AGFiQ U.S. Sector Class, AGF Global Growth Balanced Fund, AGF Global Real Assets Fund and AGF Strategic Income Fund until January 1, 2020.

AGF Investments LLC, an indirect wholly-owned subsidiary of AGF, provides investment advisory services to AGF Global Sustainable Balanced Class (effective August 16, 2021), AGFiQ U.S. Sector Class, AGFiQ Global Balanced ETF Portfolio Fund, AGF Global Corporate Bond Fund (effective August 16, 2021), AGFiQ Global Income ETF Portfolio Fund and

AGF Global Sustainable Balanced Fund (effective August 16, 2021).

The Funds may invest in ETFs in a manner consistent with the Funds' investment objectives and permitted by law. Funds with ETF exposure during the reporting period bear indirectly the management fees (which includes investment management fees) borne by the ETFs, after giving effect to rebates or waivers, as applicable. All series of the Funds that invest in Underlying Funds with ETF exposure may bear indirectly the management fees (which includes investment management fees) of the ETFs indirectly borne by the funds, after giving effect to any rebates or waivers, as applicable.

Under these management and investment advisory agreements, the Funds agree to pay management and advisory fees, which are calculated daily and payable monthly, based on the aggregate annual rates (see the following table) applicable to the average Net Asset Value of the respective series of each fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Funds' shares/units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager. The Manager, at its discretion, may waive management and advisory fees otherwise payable by the Funds (see Note 7(b)). Management and advisory fees payable to the Manager by Series I, Series O, Series Q and Series W shareholders/unitholders for portfolio management services are arranged individually with each shareholder/unitholder and are not expenses of the Funds.

Certain funds invest in Underlying Funds and do not pay duplicate management and advisory fees on the portion of the assets that they invest in the Underlying Funds. Accordingly, the Manager will waive the management and advisory fees payable or paid by the Underlying Funds in order to avoid such duplication.

The aggregate annual management and advisory fee rates applicable to the respective series of each fund are as follows:

(b) Each fund is responsible for its administrative and operating expenses. The Manager pays these expenses on behalf of the Funds, and is then reimbursed by the Funds for such expenses. During the periods ended September 30, 2021 and 2020, the Manager waived certain fees (including management and advisory fees, as applicable) or absorbed certain expenses otherwise payable by the Funds. The Manager may, at its discretion, terminate the waiver or absorption at any time. The "Accrued expenses" or "Receivable from Manager", as applicable, in the Statements of Financial Position include the amount of reimbursement to or from the Manager for

operating expenses (net of absorption, if applicable) paid on behalf of the Funds.

(c) AGF CustomerFirst Inc., an indirect wholly-owned subsidiary of AGF, provides transfer agency services to the Funds. Certain operating expenses relating to registrar and transfer agency services are paid directly by the Manager and in exchange, a fixed rate administration fee was introduced for the Mutual Fund Series, Series F, Series FV, Series I, Series T, Series V and Classic Series Shares/Units, as applicable, of the Funds. The administration fee is calculated daily and payable monthly, based on the fixed annual rate (see below table) applicable to the

Independent Review Committee ("IRC")

In accordance with National Instrument 81-107, the Manager has established an IRC for the Funds. The mandate of the IRC is to review and make recommendations with respect to, or in certain circumstances, approve, conflicts of interest matters but only if such matters are brought to it by the Manager. Remuneration paid to members of the IRC are charged to the Funds and the amounts are included in "Independent review committee fees" in the Statements of Comprehensive Income.

8. SOFT DOLLAR COMMISSIONS:

In addition to covering brokerage services on security transactions, commissions paid to certain brokers may also cover research services provided to the investment manager. The values of the research services included in the commissions paid by each fund to those brokers are as follows:

Periods Ended September 30, (thousands of dollars)	2021 (\$)	2020 (\$)
AGF American Growth Class	85	101
AGF Canadian Growth Equity Class	64	192
AGF Global Equity Class	37	22

Soft dollar commissions do not apply to funds that invest in Underlying Funds.

9. COMPARATIVE FIGURES:

Commencing in the current year, purchased options are separately presented as "Purchased options at fair value through profit or loss" in the Statements of Financial Position rather than the past practice of being included in "Investments at fair value through profit or loss". The comparative amounts have been reclassified to conform with the current year's presentation. In addition, unrealized gains and losses on purchased options are now included in "Net change in unrealized appreciation (depreciation) in value of derivatives" in the Statements of Comprehensive Income with a corresponding reclassification of the comparative amounts.
